ARUN C

DATA ANALYST

| carun9542@gmail.com|+91 93603 74355 |

PROFESSIONAL SUMMARY

MCA graduate seeking an entry-level Data Analyst role, with hands-on experience using Python and SQL to clean, process, and analyze data. Practical project experience covers the full data workflow — data collection, preprocessing, exploratory analysis, model evaluation, and visualization of results — through an applied deep learning project. Comfortable working with MySQL databases and MS Excel for reporting and data management, with a strong analytical mindset and eagerness to build a career in data analytics.

CORE STRENGTHS

- Hands-on experience cleaning, preprocessing, and structuring data for analysis using Python.
- Practical exposure to querying and managing data using SQL and MySQL.
- Experience interpreting results and communicating findings through charts and visualizations.
- Strong attention to detail, with solid data-entry and documentation habits using MS Excel.
- Analytical thinker who is comfortable working with structured and unstructured data.
- Quick learner, adaptable to new analytics tools and techniques.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analysis: Data Cleaning, Data Preprocessing, Exploratory Data Analysis, Data Visualization

Database: MySQL – querying, data management

Reporting Tools: MS Excel, MS Word, MS PowerPoint

Web Technologies: HTML, CSS (Basic)

Tools & IDEs: Visual Studio Code, Jupyter Notebook

Version Control: Git (Basic)

Operating Systems: Windows

Other: Documentation & Data Management, Data Entry

ACADEMIC PROJECT

Bee Species Classification Using Deep Learning — A Data-Driven Analysis

Technologies: Python, TensorFlow/Keras, OpenCV, NumPy, CNN

Objective: Analyze a labeled image dataset of bee species and build a model to classify species accurately, focusing on clean data preparation and clear performance reporting.

My Contribution:

- Collected and organized a labeled image dataset, structuring it for consistent analysis and model input.
- Cleaned and preprocessed the raw data — resizing, normalizing, and augmenting images — to improve data quality.
- Performed exploratory analysis on the dataset to understand class distribution and identify data imbalances.

- Built and trained a classification model, then analyzed its output to identify patterns in misclassification.
- Visualized training and validation accuracy/loss trends using charts to report model performance clearly.
- Summarized findings and performance metrics in a structured report format.

Outcome: Delivered a data pipeline and analysis — from raw image data to a clearly reported, evaluated classification model — demonstrating end-to-end data analysis skills applicable to broader analytics work.

SOFT SKILLS

- Analytical Thinking & Problem Solving
- Attention to Detail
- Team Collaboration
- Time Management
- Adaptability & Willingness to Learn

AREAS OF INTEREST

- Data Analysis & Data Visualization
- Business Intelligence & Reporting
- Database Management
- Machine Learning

EDUCATION

Master of Computer Applications (MCA)
Vasavi Vidya Trust Group of Institutions | 2023 – 2025 | CGPA: 7.94 / 10

Bachelor of Science (B.Sc.) – Computer Science
Government Arts and Science College | 2020 – 2023 | CGPA: 7.167 / 10

LANGUAGES KNOWN

Languages: Tamil (Native), English (Professional Working Proficiency)

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
