OBJECTIVE

Motivated Artificial Intelligence and Data Science undergraduate with strong analytical and problem-solving skills. Seeking to contribute to innovative, technology-driven solutions while continuously learning and growing in a dynamic professional environment.

EDUCATION

Graduation Details 2023-2027 (B.Tech-AI&DS)
Kongunadu College of Engineering and Technology — CGPA : 8.54

HSC 2022-2023
Sri Vani Matric Higher Secondary School — Percentage : 88.3%

SKILLS

- **Programming Languages :** Python, Java
- **Data Analysis Tools & Libraries :** SQL, PowerBI, NumPy, Pandas
- **AI Technologies :** Machine Learning, RAG Systems
- **Web Technologies :** HTML5, CSS3
- **Tools & Platforms :** Git, Figma

PROJECT

1. FloatChat: AI-Powered Conversational System for Ocean Data Discovery

- Developed a RAG-based chatbot for ocean data retrieval, aimed at helping ocean researchers access domain-specific insights efficiently.
- Implemented embeddings using all-MiniLM-L6-v2 and LLaMA-based models to enable accurate, context-aware retrieval from ocean datasets.
- Built an efficient query pipeline that surfaces relevant domain-specific insights, improving research productivity.

2. Emotion Preserving Text Rewriting System

- Developed an NLP-based web app that rephrases sentences while preserving a user-selected emotional tone, aimed at storytellers and students improving their writing.
- Implemented emotion-aware rephrasing using DistilBERT for emotion detection and T5 Transformer for text regeneration.
- Built with Python and Flask, integrating TTS to generate expressive audio output for better learning and expression.

INTERNSHIP

Full Stack Development Intern - Oneyes Infotech Solutions — **April-2025**

- Redesigned the CareerMate website interface, focusing on professional layout, visual hierarchy, and user navigation flow.
- Designed high-fidelity UI prototypes using Figma, ensuring consistent branding, spacing, and component design across pages.
- Collaborated on translating design decisions into practical, user-friendly layouts suited for a professional web application.

ACHIEVEMENTS

- **Secured 2nd place in an inter-college Hackathon :** Smart Pond Waste Collector using IoT and Arduino technologies to address water pollution challenges.
- **Finalist in the Panimalar Women's Hackathon :** AI-powered threat detection system ,using machine learning techniques to identify suspicious activities.
- **Finalist in the CMR Hackathon :** Smart Career Pathway Chatbotdesigned to guide rural learners. In identifying suitable career paths and learning directions.

CERTIFICATIONS

- Completed Java Basic Certification from Coding Ninjas.
- Completed Machine Learning with AI Applications at Kongunadu College of Engineering and Technology.
