# ABIRAMI K

B.Tech - Artificial Intelligence & Data Science
7358468006 abiramik2503@gmail.com LinkedIn | Abirami K Github | Abirami K

## OBJECTIVE

A motivated student with a passion for technology and continuous learning. Known for being adaptable, curious, and open to new challenges. Eager to contribute to a dynamic team while building a successful career through dedication and continuous growth. Committed to continuously enhancing skills and making meaningful contributions in every opportunity undertaken.

## EDUCATION

**Graduation Details 2023-2027 (B.Tech-AI&DS)**
Kongunadu College of Engineering and Technology — CGPA : 8.54

**HSC 2022-2023**
Sri Vani Matric Higher Secondary School — Percentage : 88.3%

## SKILLS

- **Programming Languages :** Python, Java
- **Data Analysis Tools & Libraries :** SQL, PowerBI, NumPy, Pandas
- **AI Technologies :** Machine Learning, RAG Systems
- **Web Technologies :** HTML5, CSS3
- **Tools & Platforms :** Git, Figma

## PROJECT

**1. FloatChat: AI-Powered Conversational System for Ocean Data Discovery**

- Developed a RAG-based chatbot for ocean data retrieval, aimed at helping ocean researchers access domain-specific insights efficiently.
- Implemented embeddings using all-MiniLM-L6-v2 and LLaMA-based models to enable accurate, context-aware retrieval from ocean datasets.
- Built an efficient query pipeline that surfaces relevant domain-specific insights, improving research productivity.

**2. Emotion Preserving Text Rewriting System**

- Developed an NLP-based web app that rephrases sentences while preserving a user-selected emotional tone, aimed at storytellers and students improving their writing.
- Implemented emotion-aware rephrasing using DistilBERT for emotion detection and T5 Transformer for text regeneration.
- Built with Python and Flask, integrating TTS to generate expressive audio output for better learning and expression.

## INTERNSHIP

**Full Stack Development at Oneyes Infotech Solutions** — **April-2025**

- Redesigned the CareerMate website interface, focusing on professional layout, visual hierarchy, and user navigation flow.
- Designed high-fidelity UI prototypes using Figma, ensuring consistent branding, spacing, and component design across pages.
- Collaborated on translating design decisions into practical, user-friendly layouts suited for a professional web application.

## ACHIEVEMENTS

- **Secured 2nd place in an inter-college Hackathon :** Smart Pond Waste Collector using IoT and Arduino technologies to address water pollution challenges.
- **Finalist in the Panimalar Women's Hackathon :** AI-powered threat detection system ,using machine learning techniques to identify suspicious activities.
- **Finalist in the CMR Hackathon :** Smart Career Pathway Chatbotdesigned to guide rural learners. In identifying suitable career paths and learning directions.

## CERTIFICATIONS

- Completed Java Basic Certification from Coding Ninjas.
- Completed Machine Learning with AI Applications at Kongunadu College of Engineering and Technology.
