ACADEMIC PROFILE

Motivated final-year Aeronautical Engineering student with hands-on knowledge of CAD, ANSYS, and MATLAB. Completed the design and fabrication of an RC fixed-wing aircraft, with strong interest in UAV systems, aerodynamics, and flight performance optimization. Seeking to contribute to advanced aerospace engineering projects while gaining further industry exposure.

EDUCATION

Bachelor of Engineering – Aeronautical Engineering | *Expected: May 2027*

Excel Engineering College, Komarapalayam, India

Cumulative CGPA: 8.1 / 10.0

TECHNICAL PROJECTS

Design and Fabrication of RC Fixed-Wing Aircraft

- Designed and fabricated a fully functional RC fixed-wing aircraft from concept to prototype.
- Applied aerodynamic principles and CAD tools (SolidWorks/AutoCAD) for structural design and airfoil selection.
- Focused on flight performance optimization and UAV system integration.

Aerodynamic Cycle Analysis — Aircraft Propulsion | *Research Project, 2026*

- Studied the complete aerodynamic cycle used in aircraft propulsion systems.
- Analyzed compressor, combustion chamber, turbine, and nozzle performance.
- Evaluated thrust generation, thermal efficiency, and pressure variations.

PRACTICAL TRAINING & INDUSTRIAL EXPERIENCE

Intern — Aakash Aerospace Pvt Ltd, Erode, India | *Dec 2025 – Jan 2026*

- Supported staff members in daily tasks, enabling greater focus on higher-priority assignments.
- Analyzed engineering problems and collaborated with teams to develop effective solutions.
- Gained hands-on experience with aerospace software, expanding technical proficiency.

Intern — ZF Commercial Vehicle Control System, Ambattur, Chennai (Dept. of Clutch Servo) | *Jun 2026 – Aug 2026*

- Performed assembly of clutch servo components as per production specifications.
- Conducted air pressure and leak testing to ensure proper functioning of the unit.
- Carried out final quality inspection and verified operational performance before dispatch.

Intern — The Salem Aerospace Pvt Ltd, Salem, India | *Dec 2024 – Jan 2025*

- Applied learned engineering concepts directly in industry-relevant work situations.
- Explored new technologies and approaches to streamline operational processes.
- Assisted in development of a new product feature, contributing to an improved user experience.

CERTIFICATIONS

- ANSYS Workshop Certificate
- Internship Certificates — Aakash Aerospace & Salem Aerospace
- Workshop & Technical Participation Certificates

Drone Training Program — Flytutor Technologies Private Limited (15–20 April 2026)
