MONISH S

Full stack Developer | Python Developer

Erode, Tamil Nadu, India | 9942507350 | monish350s@gmail.com | monish.tech | github.com/S-MONISH18

SUMMARY

Full Stack Developer and final-year Information Technology student with hands-on experience building web and mobile applications using Python, React, Next.js, Node.js, Django, and REST APIs. Experienced in AI-powered applications, API integration, database development, and secure software systems. Strong foundation in frontend and backend development with experience delivering projects through hackathons and innovation challenges.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML, CSS
Frontend: React, Next.js, React Native, Streamlit
Backend: Django, Node.js, Express.js, REST APIs
Databases: MongoDB, SQL
AI/ML: Pandas, NumPy, TF-IDF, Claude API, LLM Integration
Tools: Git, GitHub, Jupyter Notebook, Google Colab, Figma, n8n

PROJECTS

AI-Powered Resume Chatbot / *Python, Claude API*

- Developed a conversational AI chatbot using TF-IDF based retrieval and Claude API (LLM integration) to answer resume-related queries in natural language.

SmartHill – Agricultural Marketplace App / *React Native, JavaScript, Express.js, REST API*

- Developed a role-based agricultural marketplace using **React Native, JavaScript, Express.js, and REST APIs** for farmers, customers, and tractor owners.
- Implemented product transactions, tractor rentals, booking workflows, and farm-data management through RESTful API integration.
- Designed separate user workflows and role-based functionality to support multiple agricultural use cases.

Career Guidance Chatbot / *Python, Streamlit*

- Built a full-stack Python career guidance application covering frontend, backend, and database connectivity.

AES File Encryption/Decryption System / *Python, AES*

- Developed a secure file storage and management system using AES encryption.

INTERNSHIP EXPERIENCE

Python/Django Developer Intern | *Adhoc Softwares Private Limited, Coimbatore*
Internship

Online Bookstore – Python, Django, HTML, SQL

- Developed a Django-based online bookstore with dynamic book listings, user registration/login, and CRUD operations for book management.
- Implemented MVT architecture, database connectivity, form validation, URL routing, and responsive frontend-backend integration.

UI/UX Designer / *AR Technologies*

- Designed intuitive user interfaces for digital products and collaborated with development teams to improve user experience.
- Applied UI/UX best practices in real-time production projects.

ACHIEVEMENTS

- **Participant – Ideas to Impact (i2i) Challenge 3.0, Top 50 Teams Bootcamp**, IIT Madras (Aug 2026)
- **Participant – PALS Innowah Grand Final**, IIT Madras (Mar 2026)
- **Participant – PALS Think2Impact Industry Problem-Solving Workshop**, Jeppiaar Institute of Technology, Chennai (Jan 2026)
- **Participant – 24-Hour Hackathon**, KPR Institute of Engineering and Technology (Sep 2025)
- **Participant – PALS Tinkathon**, MEPCO Schlenk Engineering College (Sep 2025)
