NIVETHIKA A S

ARTIFICIAL INTELLIGENCE AND DATA SCIENCE ENTHUSIAST

+91 7904899514 | nivaethika08@gmail.com | linkedin.com/in/nivethika08 | github.com/Nivethika

PROFESSIONAL SUMMARY

Aspiring to contribute to the development of intelligent applications by applying knowledge in Generative AI, Large Language Models (LLMs), and machine learning, while continuously learning and creating solutions that deliver meaningful real-world impact.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science
Kongunadu College of Engineering and Technology (2023–2027)

- *CGPA: 8.72*

Nazareth Metric Higher Secondary School

- *HSC - 89% (2020-2021)*

SKILLS

Programming: Java, Python, SQL
Soft Skills: Leadership, Communication, Event Management
AI Technologies: Generative AI, LLMs, RAG, Machine Learning
Tools & Frameworks: LangChain, LangGraph, Git/GitHub, VS Code

PROJECTS

CareerMate AI Agent – Career Guidance and Alumni Connect Platform
Role: Team Lead & Backend Developer | **Tech Stack:** Python, LLMs, System Prompting, RAG, Web Scraping.

- Developed an AI-driven career guidance platform offering personalized career roadmaps, resume analysis, and web scraped job and internship opportunities.
- Implemented LLM based intent routing and alumni student collaboration features to enable personalized mentorship and strengthen career networking among students and alumni.

TryOnX: AI-Powered Virtual Facewear
Role: Project Lead & Model Implementation | **Tech Stack:** Python, Diffusion Models, Computer Vision, Facial Landmark Detection

- Built an AI-powered virtual eyewear try-on system to help users preview and choose spectacles through an interactive virtual experience.
- Leveraged Generative AI and computer vision to enhance visualization accuracy and deliver a natural try-on experience.

INTERNSHIP

Generative AI & Agentic AI Intern | DigiDARA Technologies Pvt. Ltd. *Apr 2025 – Jul 2025*

- Completed hands-on training in Generative AI, LLMs, RAG, Vector Databases, LangChain, and LangGraph.
- Gained practical experience in agentic AI concepts and developing AI-driven solutions for real world applications.

Machine Learning Intern | Ffuturewise *Jan 2025 – Mar 2025*

- Built and evaluated machine learning models, applying data preprocessing, feature selection, and algorithm optimization techniques.
- Assessed model performance using evaluation metrics and data analysis to improve prediction accuracy and derive insights.

ACHIEVEMENTS

- **1st Prize – Paper Presentation** on "TryOnX: AI-Powered Virtual Facewear" at Electrospark'25, Indra Ganesan College of Engineering (National-Level Technical Symposium).
- **"Stepping Star" Individual Award** – recognised for outstanding performance at Artiverse'24 Hackathon
- **Team Lead** – coordinated development, ideation, and presentations across multiple hackathon projects.
- **Office Bearer,** Department Association – organised technical and academic events.

CERTIFICATION & COURSES

- Value Added Course on Machine Learning with AI Applications
- Value Added Course on Core Java
- Introduction to Internet of Things – NPTEL (84%)
- Cloud Computing – NPTEL (82%)
