PROFESSIONAL SUMMARY

2026 B.Tech Computer Technology graduate (CGPA 8.28) looking for a fresher role in software engineering, full stack or backend development, or AI/ML. I have built projects with the MERN stack, Python and FastAPI, using MongoDB and PostgreSQL. My work includes REST APIs with JWT login, and CI/CD with GitHub Actions and Docker.

TECHNICAL SKILLS

Languages	JavaScript, Python, Java, C, SQL
Full Stack	MERN Stack (MongoDB, Express.js, React.js, Node.js), FastAPI
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, FastAPI, REST API Design, JWT Authentication, Argon2 Password Hashing, Role-Based Access Control
Databases	MongoDB, PostgreSQL, MySQL, SQLite
Tools / DevOps	Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, Render, VS Code
Practices	API Testing and Debugging, Technical Documentation, SDLC, Agile/Scrum

PROJECTS

CareerEvidence – AI-Era Student Employability Platform Ongoing
React.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Python (NLP)
- Building a platform that collects entry-level job postings from live job-market APIs, classifies roles, and extracts and normalizes the skills they ask for.
- Analyzes market demand and finds each student's skill gaps and missing project evidence, then suggests learning steps that fit their workload.
- Using a React + TypeScript frontend and a Node.js/Express backend with PostgreSQL (Prisma) and JWT login; Python NLP handles skill extraction.

SkillSync – AI-Based Student Skill & Mentorship Platform github.com/gayathirivenkatesh/skill_sync
React.js, FastAPI, Python, MongoDB, GitHub Actions
- Built a full-stack mentorship platform with 12+ REST API endpoints for login, profiles, skill assessment and recommendations.
- Wrote the FastAPI backend with async MongoDB access, Argon2 password hashing, and JWT login using OAuth2 bearer tokens.
- Added role-based access control, built React dashboards to track progress, and set up GitHub Actions CI/CD.

Metadata Image & Video Anonymizer github.com/gayathirivenkatesh/anonymizer
Python, FastAPI, OpenCV, React.js, Docker, Vercel, GitHub Actions Live Demo: anonymizer-seven.vercel.app
- Built a FastAPI service that finds and removes EXIF/XMP metadata from images, videos and documents across 5 file formats.
- Used async I/O for speed and packaged the backend with Docker; deployed the React frontend on Vercel with GitHub Actions for build, test and deploy.

EXPERIENCE

Full Stack Development Intern – TechnoHacks Solutions Pvt. Ltd. (Remote) Feb 2026 – Mar 2026
- Built a MERN application with REST APIs (GET, POST, PUT, DELETE), a responsive React UI, JWT login and role-based access control.
- Designed and tested 6+ CRUD API endpoints, used Git for version control, and wrote the technical documentation.

EDUCATION

B.Tech, Computer Technology – Bannari Amman Institute of Technology Nov 2022 – Apr 2026
CGPA: 8.28 / 10.0 | Coursework: Computer Networks, Machine Learning, DBMS, Operating Systems

CERTIFICATIONS

- Introduction to LangChain – Python, LangChain Academy
