PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student skilled in HTML, CSS, JavaScript, and Java, with hands-on experience in AI-based and data-driven application development. Strong problem-solving and debugging skills, seeking an entry-level Software Developer role.

EDUCATION

Degree / School	Institution	Score	Year
B.E., Electronics & Communication Engineering	Nandha Engineering College	CGPA 7.6	2027 (Exp.)
Higher Secondary Certificate (HSC)	Holy Angel Matric Hr. Sec. School	75.6%	2023

TECHNICAL SKILLS

- **Programming:** Java, Kotlin, C, Basics of Python
- **Android Development:** Jetpack Compose, MVVM, Room, Hilt, Ktor, Kotlin Coroutines, Flow
- **Web Development:** HTML, CSS, JavaScript
- **AI & Computer Vision:** YOLO, Groq AI (LLM Integration), Real-time Object Detection
- **Tools & Technologies:** Android Studio, Git, GitHub, SQLite, Vico Charts
- **Core Strengths:** Problem Solving, Debugging, Analytical Thinking, Team Collaboration

PROJECTS

VISION BASED ELEPHANT DETECTION SYSTEM UING INTEGRATED CAMERA

- Built the detection logic using the YOLO AI object-detection model to identify elephants in real time from live camera feeds.
- Developed the automated alert pipeline that triggers SMS and in-app notifications to residents and forest officials immediately upon detection.

PFOS (Personal Finance Optimization System)

- Built a full-stack Android application using Kotlin, Jetpack Compose, Room, and MVVM for personal finance management, including expense tracking, budgeting, debt, and investment monitoring.
- Integrated Llama 3.1 (Groq AI) to deliver personalized financial insights and developed interactive dashboards for real-time expense analysis and wealth forecasting.

INTERNSHIP AND EXPERIENCE

NLC INDIA LIMITED **JUNE 2025 – JULY 2025**

- Observed the operation and maintenance of industrial control systems and electrical equipment in a real-time environment.
- Strengthened practical knowledge of instrumentation, system monitoring, and industrial engineering workflows through hands-on training.

AWARDS

- Awarded Third Prize at REGENHACK VR 2.0, a 36-hour national-level hackathon organized by SRM Institute of Science and Technology, Kattankulathur, for developing an innovative technology solution.
