PROFESSIONAL SUMMARY

Information Technology student focused on backend and AI systems, with hands-on experience building and shipping full-stack applications that integrate OpenAI and Azure AI services with Java/Spring Boot backends, as well as cross-platform mobile apps with React Native and Node.js/Express. Comfortable across API design, relational databases, and applied prompt engineering. Seeking a Software Engineer or Full Stack Developer role.

EDUCATION

Bachelor of Technology in Information Technology *Graduation: 2027*
Sri Shanmugha College of Engineering and Technology, Anna University *CGPA: 8.14/10*
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, JavaScript, TypeScript
- **Backend Technologies:** Spring Boot, Node.js, Express.js
- **Mobile Development:** React Native, TypeScript
- **AI:** OpenAI API, Azure AI, Prompt Engineering
- **Database:** MySQL
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Tools:** Git, GitHub, Maven, Postman, VS Code
- **Soft Skills:** Problem Solving, Communication, Team Collaboration, Self-Learning

WORK EXPERIENCE

Tele-Consultant *Aug 2024 – Dec 2024*
Remote

- Provided remote technical support and troubleshooting for clients across voice and chat channels.
- Collaborated with distributed teams to diagnose recurring technical issues and maintained high customer satisfaction.

ACADEMIC PROJECTS

Smart Traffic AI — Traffic Prediction & Emergency Route Optimization
Python, LSTM, SUMO, NetworkX, Streamlit

- Built an AI system for emergency vehicles that predicts urban traffic congestion using an LSTM model and dynamically reroutes vehicles in a SUMO traffic simulation via NetworkX.
- Analyzed live road speeds and vehicle density to avoid bottlenecks, reducing travel transit cost by ~67%.
- Built an interactive Streamlit dashboard for live monitoring of traffic conditions and rerouted vehicle paths.

AI Course Builder
Java, Spring Boot, JPA/Hibernate, OpenAI API

- Built an AI-powered platform that generates courses, modules, lessons, and quizzes from user-defined topics.
- Designed and implemented RESTful APIs in Spring Boot, integrating the OpenAI API for automated content generation and grading.
- Modeled and persisted data using Spring Data JPA/MySQL; built responsive frontend interfaces for content creation and review.

Smart Task & Productivity Manager
React Native, TypeScript, Node.js, Express.js, MongoDB

- Built a cross-platform task management app with React Native and TypeScript, featuring a dashboard summarizing total, completed, and pending tasks.
- Implemented task categorization (Study, Backend, Mobile, Project), priority levels (Low/Medium/High), and due date/time scheduling with calendar-based filtering.
- Developed a RESTful API backend using Node.js and Express.js, with MongoDB for persistent storage of tasks and categories.
- Enabled full task lifecycle management — create, mark complete, and delete — with a responsive, real-time UI synced to the backend.

CERTIFICATIONS

- Apache Maven Course – Certificate code: 10642334, Aug 2026
- Develop AI Agents on Azure (Microsoft Learn Learning Path) – Sep 2025
- Develop Natural Language Solutions in Azure – Microsoft, Aug 2025
- Hackathon – Zeai-Soft 2026, Made in India Hackathon

LANGUAGES

- English • Tamil
