CAREER SUMMARY

UI/UX Designer with a background in Information Technology and a strong interest in creating simple, intuitive, and user-friendly digital experiences. Skilled in understanding how people interact with products, identifying usability problems, and translating ideas into clean, meaningful designs. Proficient in UX research, wireframing, prototyping, and UI design, with a strong focus on usability and visual clarity. Committed to continuous learning and creating designs that make digital experiences easier for people.

SKILLS

UI/UX Design : UX Research, UI Design, Prototyping, Wireframing, Usability Testing, Information Architecture

Design Tools : Figma, FigJam, Canva

Development : HTML, CSS

AI Tools : ChatGPT, Claude AI, Gemini

FEATURED PROJECT

1. ***Vibra Shield — Solo Traveler Safety App (Case Study)*** *Figma . UX Research . Prototyping*

- Designed a mobile safety app focused on quick emergency assistance and safer solo travel.
- Addressed key user needs including location awareness, emergency access, and language barriers.
- Created user flows, wireframes, and high-fidelity screens for a simple and accessible experience.

2. ***Aegis — Biometric-Adaptive Triage Interface (Case Study)*** *UI/UX Design . Team Lead . Infotact Solutions*

- Designed an adaptive triage interface to support emergency responders during high-pressure situations.
- Applied UX research and Fitts's Law to simplify interactions and reduce cognitive load.
- Created Tunnel Vision Mode to highlight critical actions and improve response speed during emergencies.

3. ***Synapse — Spatial Intelligence & Sensemaking Canvas*** *UI/UX Design . Team Lead . Infotact Solutions*

- Designed an investigation management platform for investigators to manage and analyze case information.
- Created an interactive canvas to connect people, organizations, transactions, documents, and other information.
- Focused on helping investigators find connections, track evidence, and understand complex cases more easily.

EXPERIENCE

UI/UX Design Intern & Team Lead — Infotact Solutions, Bangalore

June to August 2026 - (2 Months)

- Coordinated team tasks, design discussions, and project activities as a Team Lead.
- Conducted UX research to understand user needs and translate insights into practical design solutions.
- Created user flows, wireframes, prototypes, and high-fidelity UI designs using Figma.
- Focused on usability, visual hierarchy, accessibility, and consistent interface design.
- Worked through design iterations based on feedback to improve the overall user experience.
- Collaborated with team members during design reviews, discussions, and project presentations.
