NAVANEETHRAJ KA

Aspiring Software Engineer

nvnthrj@gmail.com | +91 6381206120 | Coimbatore, Tamil Nadu | linkedin.com/in/navaneethraj-alagiri | github.com/Navaneethka-Dev

PROFESSIONAL SUMMARY

Motivated and detail-oriented final year B.Tech student specializing in Information Technology with a solid foundation in Java programming, web application development, and database management. Proficient in building full stack applications using Java, Spring Boot, React, and SQL. Experienced in frontend technologies including HTML, CSS, and JavaScript, along with cloud deployment on AWS. Familiar with software testing methodologies, AI-powered automation tools, and hands-on experience with data analytics. Seeking an opportunity to apply academic knowledge and hands-on project experience to contribute to enterprise software development in a dynamic IT environment.

EDUCATION

Bachelor of Technology in Information Technology — 2023 - 2027
Sri Krishna College of Technology, Coimbatore — **CGPA: 7.9 / 10**

12th Grade — Completed 2023
SSM LAKSHMIAMMAL MATRICULATION SCHOOL, Komarapalayam — **Percentage: 88.3%**

10th Grade — Completed 2021
Sri Nachiyar Matriculation School, Jalakandapuram — **Percentage: 90%**

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Databases & Warehousing: MongoDB, MySQL

Machine Learning & AI: Supervised/Unsupervised Learning, CNNs, Explainable AI (CEM), Contrastive Learning, Human-in-the-Loop

Cloud & Tools: AWS (S3, EC2, EMR), Azure Components, Git, REST APIs

EXPERIENCE

Full Stack Development Intern (Onsite) — *May 1, 2026 - May 31, 2026*
Azhizen Solutions

- Contributed to full-stack web development tasks and gained hands-on experience in building dynamic applications during an intensive one-month onsite internship.
- Collaborated with the development team to write, test, and deploy clean, scalable code.

PROJECTS

AI-Based Multi-Hazard Real-Time Emergency Monitoring & Response Drone System — *Python | YOLOv8 | OpenCV*

- Developed a real-time autonomous drone surveillance system leveraging YOLOv8 computer vision to detect dangerous crowd density, traffic congestion, and disaster zones under a ₹20k prototype budget.
- Implemented a Predictive Risk Assessment Engine that calculates real-time risk scores (0–100) based on localized crowd density levels, sudden motion changes, and abnormal clustering.
- Built an interactive live emergency web dashboard mapping crowd/vehicle counts, congestion heatmaps, and hazard alert status for rapid disaster management response.

QDine - Smart Restaurant Queue Management System

- Developed a full-stack smart restaurant management system to optimize queue handling and operations.
- Integrated AI-driven wait time predictions, virtual queues, and a live table map visualization to enhance the customer dining experience.
- Built an analytics dashboard for restaurant managers and implemented secure RESTful APIs with Express and JWT authentication.

DeepShield - AI-Powered Digital Forensics & Deepfake Detection Platform — *Python | FastAPI*

- Developed a distributed, network-centric digital forensics platform for multi-modal deepfake detection and authenticity verification, deployed on AWS cloud infrastructure using Docker.
- Engineered secure data transmission and network-level metadata analysis to extract and verify forensic evidence (IP routing, file hashes, timestamps) for cybercrime investigations.
- Implemented a robust backend architecture with FastAPI and Blockchain-based evidence verification across network nodes to generate real-time Explainable AI trust scores and professional reports.

CERTIFICATIONS

The Joy of Computing Using Python - NPTEL
Python Essentials - Cisco Networking Academy
Effective Writing - NPTEL
AWS Cloud Foundations - Amazon Web Services
Introduction to Cybersecurity - Cisco
Introduction to Networks - Cisco Networking Academy

ACHIEVEMENTS & ACTIVITIES

- Demonstrated strong problem-solving capabilities by balancing academics with active participation in Hackathons (Codeathon Winner at Sri Eshwar College).
- Conducted workshops on Network & Data Automation, highlighting interpersonal and communication skills.
- Reliable and punctual academic performer with a consistent CGPA (7.9/10) without any backlogs.

LANGUAGES

English (Fluent), Tamil (Native), Hindi (Basic), Kannada (Basic)
