PROFESSIONAL SUMMARY

AI Engineer skilled in building LLM-powered applications using RAG pipelines and vector databases. Hands-on experience in developing and deploying production-ready AI systems with real-world impact.

SKILLS

Languages: Python, SQL
ML & AI Frameworks: TensorFlow, Scikit-learn, Hugging Face Transformers, LangChain
AI & API Skills: OpenAI API, Anthropic API, Gemini API, Prompt Engineering, RAG, Vector Databases (ChromaDB)
Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn
Backend & Deployment: FastAPI, Docker, Git, GitHub
Databases: MySQL, MongoDB
Tools: VS Code, Jupyter Notebook

EXPERIENCE

Reel2Cart Technologies | (Academic Startup) ,Technical Lead 2025 – Present
Namakkkal

- Worked as a core team member on a reel-based social commerce platform, contributing to key technical decisions and cross-functional collaboration.

Supporticon Strategies Private Limited | *Junior Software Developer(Intern) , Salem* Aug 2025 – Sep 2025

- Engineered a Website Usage Analytics Dashboard (10+ metrics, MongoDB) and a Medicine Refill Analysis system (MySQL), reducing manual tracking effort by 40%. Gained hands-on exposure to AI Agents, LLMs, and full-stack development within a production SaaS environment.

PROJECTS

Res-Q-Food -- AI-powered food donation platform | Team Leader, AI Developer | (Final Year Project) 2026--Present

- Developing a platform that intelligently prioritizes and matches surplus food donations to NGOs and volunteers in real time, Reduces manual coordination delays and food spoilage through automated routing and smart decision-making.

Chef Rolex.ai – Intelligent Recipe Assistant 2026

- Built an AI-powered recipe assistant on FastAPI with personalized meal planning, sub-second AI response times, robust rate-limiting, and 99.9% uptime via optimized full-stack deployment.

ATS X-Ray – Resume Analyzer 2025

- Built a containerized ATS platform (Python, FastAPI, MongoDB, Docker) with Google Gemini 2.5 Flash API for NLP & Vision OCR — delivering ATS scoring, JWT auth, and personalized cover letter generation with 90%+ accuracy.

EDUCATION

Bachelor of Engineering in Computer Science -- (CGPA : 8.07*) 2023 – 2027
Mahendra Institute of Technology, Namakkal

HSC (12th Grade) – Mathematics and Computer Science – (70.5%)
Modern Higher Secondary School, Salem 2022 – 2023

ACHIEVEMENTS & LEADERSHIP

Project Lead – "English Pesalaam Vaainga" Book Development 2025

- Lead 20 junior students in a book publication project, delivering successfully on tight timelines.

Event Coordinator – Hackfest 2025

- Coordinated Hackfest 2025 at Annapoorna Engineering College, guiding participants through a smooth two-day inter-college hackathon.

CERTIFICATES

Udemy – Data Structures and Algorithms Course 2026 -- Present

- Comprehensive DSA course (Udemy) covering arrays, trees, graphs, sorting and searching — strengthened problem-solving and coding efficiency.

Artificial Intelligence – Rinex Organization Jan 2024 – Mar 2024

- 3-month internship and AI course at Rinex — hands-on exposure to software development workflows and foundational AI concepts.
