CAREER OBJECTIVE

Motivated and detail-oriented Information Technology student with hands-on experience building LLM-powered applications using LangChain, LangGraph and RAG. Skilled in fine-tuning open-source models with LoRA, QLoRA and SFT and in designing multi-step AI agent workflows. Seeking an AI/ML engineering role to build reliable, production-ready AI solutions while continuing to grow as an engineer.

EDUCATION

B.Tech – Information Technology, Velalar College of Engineering and Technology, Thindal — 2023 – 2027

CGPA: 7.21 / 10

INTERNSHIP

AI Intern – ATmega Software Technologies LLP, Erode, India — 27 Jul 2026 – 27 Sep 2026

- Developed AI-powered applications with LangChain and LangGraph to automate intelligent, multi-step business workflows.
- Implemented RAG pipelines that retrieve relevant document context to deliver accurate, context-aware LLM responses.
- Designed multi-step AI workflows in LangGraph with state management, routing and decision-making logic.
- Explored LoRA/QLoRA and SFT techniques to fine-tune LLMs for task-specific applications.
- Gained end-to-end experience in AI application development, debugging, testing and deployment.

PROJECTS

LLM Fine-Tuning & AI Workflow Automation — github.com/24nith

- Fine-tuned LLMs using Hugging Face Transformers, PEFT, LoRA, QLoRA and Supervised Fine-Tuning (SFT).
- Created custom JSONL datasets for intelligent command understanding and automated workflow generation.
- Configured training and tested outputs on unseen commands using Python and Google Colab.
- Explored integrating the fine-tuned model into an AI automation system that interprets instructions and generates development workflows.

Automated System Update Pipeline — Python · Git · GitHub

- Automated the development pipeline: clone a GitHub repository, apply changes, run build and test scripts, attempt AI-assisted repairs, then commit and push successful updates.
- Added creation of new GitHub repositories, deployment-hook triggers and step-by-step pipeline status display.

CORE COMPETENCIES & TECHNICAL SKILLS

AI / LLM: LangChain · LangGraph · RAG · Prompt Engineering · LLM Fine-Tuning (LoRA, QLoRA, SFT) · Hugging Face · PEFT
Programming & Data: Python · Java · PostgreSQL · Neo4j (Knowledge Graph)
Tools: Git · GitHub · Google Colab · VS Code · Android Studio · Figma · Flutter
Soft Skills: Effective Communication · Problem Solving · Teamwork · Leadership · Multi-tasking

CERTIFICATIONS

- LangChain Academy – LangChain Essentials (Python)
- IBM – AI Prompt Engineering
- Google – Foundations of Project Management
- Google – Start Writing Prompts like a Pro

KEY ACHIEVEMENTS

- Built RAG pipelines and stateful LangGraph agent workflows during an AI internship, covering development, debugging, testing and deployment.
- Fine-tuned LLMs with LoRA, QLoRA and SFT on custom JSONL datasets to turn natural-language commands into automated workflows.
- Automated a full GitHub development pipeline (clone, change, build/test, AI-assisted repair, commit, push) as an independent project.
- Earned certifications from LangChain Academy, IBM and Google in LangChain, AI prompt engineering and project management.
