PRIYA DHARSHINI S

B.E. Electronics and Communication Engineering
Ph:7639044745 Email:priyadharshini.off16@gmail.com

PROFILE SUMMARY

Electronics and Communication Engineering undergraduate with a strong interest in embedded systems and hardware development. Skilled in C, JAVA programming, microcontrollers, and basic circuit design. Hands-on experience with Arduino and sensor interfacing through academic projects. Seeking an opportunity to apply embedded system knowledge and develop practical engineering solutions.

EDUCATION

B.E - Electronics and Communication Engineering 2023–2027
Excel Engineering College (Autonomous) Current CGPA: 8.6
HSC – M.R.G.Govt.Girls.Hr.Sec. School, Erode 2023
Percentage: 82%
SSLC - M.R.G.Govt.Girls.Hr.Sec. School, Erode (All Pass) 2021

SKILLS

Technical Knowledge: Java (Basics), C
Hardware: IOT &Embedded Systems :Microcontrollers, Sensor Interfacing, Embedded C
Tools: Arduino IDE, MATLAB, VS Code, Github
Soft Skills: Problem Solving, Leadership, Communication, Teamwork

PROJECTS

RESQWEAR - Wearable Safety System for Rescue Personnal (SIH – Project)

- Developed a wearable embedded safety system to monitor toxic gas levels and environmental conditions in hazardous rescue environments.
- Implemented real-time sensor monitoring and alert mechanisms to provide timely warnings to rescue personnel during critical conditions.
- Designed and simulated the system using microcontroller programming and sensor interfacing for reliable emergency monitoring.

DRL-Based Energy Optimized Smart EV Charging System with Event- Driven Data Transmission - Project Lead (Academic Project)

- Developed a Deep Reinforcement Learning (DQN) system to optimize dynamic EV charging across a 24-hour smart grid environment.
- Integrated Time-of-Use pricing, solar generation, and battery health parameters into a multi-objective reward model, enabling adaptive power allocation (0–22 kW) and event-driven data transfer to improve grid stability and lower costs.

EXPERIENCE

PROTOWIZ PVT LTD,COIMBATORE Dec 2024

- Gained hands-on experience in embedded systems and electronics prototyping.
- Worked with microcontrollers, sensors, and basic circuit design.
- Assisted in testing and debugging embedded hardware systems.

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon (SIH) 2025 – Grand Finale Finalist, Hardware Edition, competing against top national teams Designed a hardware & software prototype in an intensive 120-hour(1 week) sprint, competing against top national teams.
- First Place – Intra College Games in Chess Competition (2026): Secured 1st place across participating in institution.
- Certifications: MATLAB & Simulink Onramp (MathWorks) | Introduction to IoT (Cisco Networking Academy)
- Presentations & Activities: Presented paper on emerging technologies at Hindustan College of Engineering & Technology | Completed technical workshop at IRTT, Erode | Student Member, IETE.
