YESHWANTH J M

BIOMEDICAL ENGINEER

+91 8220280583 | yeshwanthjm@yahoo.com | Tirupathur (Dst), 635601

PROFESSIONAL SUMMARY

Biomedical Engineer with an academic background in biomedical instrumentation and healthcare systems, along with hands-on internship exposure to medical equipment. Experienced in installation, inspection, maintenance, troubleshooting, preventive maintenance, calibration, asset management, and documentation. Brings strong communication, problem-solving, and teamwork skills with exposure to clinical and technical environments.

TECHNICAL SKILLS

Biomedical Equipment: Medical equipment maintenance and troubleshooting • Preventive maintenance (PM) and calibration • Installation and commissioning of medical devices • Biomedical equipment inventory management • Asset management and documentation

Medical Equipment Exposure: Patient monitors • Ventilators • ECG machines • Defibrillators • Infusion and syringe pumps • Dialysis machines • Anesthesia workstations • Baby warmers

Software & Professional Skills: MS Office (Word, Excel, PowerPoint) • Communication • Problem-solving • Teamwork

PROFESSIONAL EXPERIENCE

Biomedical Internship Trainee | Christian Medical College | Vellore

09/2025 – 10/2025

Completed a two-month internship in biomedical engineering, gaining hands-on experience with medical equipment.

- Assisted with the installation, inspection, maintenance, and troubleshooting of diverse biomedical devices.
- Supported preventive maintenance and calibration activities to help ensure equipment accuracy, safety, and reliability.
- Maintained service records and documentation in accordance with hospital protocols and preventive maintenance schedules.
- Collaborated with technical and clinical teams to strengthen understanding of medical equipment functionality.

PROJECTS

Hand Gesture Based Communication Systems | Mini Project

Developed as part of the sixth semester. The system enables users who cannot walk or move their legs to control lights and fans using hand gestures. The project used microcontrollers, Arduino sensors, and an LED screen.

Arduino-Based Wireless Hand Gesture on Wheelchair | Major Project

Final-year project designed to assist people with disabled or paralysed legs and others needing assistance with walking or movement. The wheelchair uses hand gestures with Arduino sensors for movement and includes PMDC motors, relays, and a rechargeable lead-acid battery.

EDUCATION

B.E./B.Tech Degree – Biomedical Engineering

Vinayaka Mission's Kirupananda Variyar Engineering College | Salem | 01/2026

CERTIFICATIONS

Atheenapandian Private Limited

Attended a 5-day training program on equipment handling and maintenance conducted in college, gaining exposure to equipment handling.
