DHARMESWARAN M

Bangalore, India | +91 99948 72885 | dharmeswaran2004@gmail.com

PROFILE SUMMARY

AI/ML Engineer with hands-on experience in building real-time AI systems using Machine Learning, Computer Vision, and Large Language Models. Skilled in developing end-to-end solutions including model training, optimization, and deployment using Python, TensorFlow, YOLOv8, and LLM frameworks. Experienced in creating interactive AI applications and solving real-world problems through data-driven approaches.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning 2022 – 2026
Christ University, Bangalore

EXPERIENCE

AI/ML Intern
Nexus Info, Coimbatore May 2024 – July 2024

- Developed and optimized end-to-end machine learning pipelines using **Python, Pandas, and Scikit-learn**, including data cleaning, feature engineering, model training, evaluation, and predictive modeling for business optimization.
- Performed exploratory data analysis (EDA) and model performance comparison to improve prediction accuracy and reliability.

Python Developer Intern
Ardhas Technology India Pvt. Ltd., Coimbatore Jan 2025 – Mar 2025
Built backend automation tools using **Python**, implementing API integration, data manipulation, debugging, and script optimization to improve internal workflows.

- Collaborated with cross-functional teams using **Git version control** and agile development practices.

Infosys Springboard — Virtual Intern (Remote) Jan 2026 –Mar 2026 Completed a structured virtual internship focused on AI/ML and data-driven problem solving, gaining hands-on experience through self-paced learning modules and real-world case studies.

- Developed a mini project applying concepts such as data preprocessing, model building, and evaluation
- Gained exposure to industry workflows, practical AI applications, and professional development skills

TECHNICAL SKILLS

- **Programming Languages:** Python, HTML, CSS
- **Machine Learning & AI:** TensorFlow, Scikit-learn, PyTorch, Machine Learning, Deep Learning
- **Computer Vision:** OpenCV, YOLOv8, Image Processing
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **NLP & AI Tools:** Large Language Models (LLMs), Speech Recognition
- **Web & Tools:** React.js, Firebase, Git, Google Colab
- **Data Structures & Algorithms:** Arrays, Linked Lists, Trees, Graphs, Dynamic Programming

PROJECTS

AI-Based Blind Navigation & Companion System — Diana
Technologies: Python, OpenCV, YOLOv8n, Groq LLaMA 3.3 70B, Whisper, Porcupine

- Fine-tuned YOLOv8n for real-time obstacle detection; integrated LLM-based intelligent navigation with silence-first design, custom wake word, Voice Activity Detection, and full offline speech pipeline running on 5 parallel threads

AI-Powered Semi-Humanoid Robot
Technologies: Python, LLM, SpeechRecognition

- Built an interactive robot assistant for campus guidance using LLMs for dynamic Q&A, with gender recognition for personalized visitor interaction

NarrativeFlow: Interactive Story Co-Writer
Technologies: Python, Streamlit, Ollama, LLaMA39
• Developed an AI-powered storytelling chatbot using Streamlit and Ollama with a locally hosted LLaMA3 model, implementing prompt engineering for context-aware story generation, along with an interactive interface supporting genre and tone customization and maintaining multi-turn conversation continuity

---

ACHIEVEMENTS

Finalist, Smart India Hackathon – Christ University (August 2024)
GDG 24-Hour Hackathon – KSR Institute of Technology (Nov 2024)
