REKHA.V

Electronics & Communication Engineering Student | Aspiring VLSI Engineer

Tamil Nadu, India | +91 8098529989 | rekhavr2006@gmail.com

PROFESSIONAL SUMMARY

Motivated Electronics and Communication Engineering student with a strong interest in **VLSI Design and Semiconductor Technology**. Possess foundational knowledge of digital electronics, embedded systems, IoT, and Verilog programming. Gained practical exposure through industrial internships, an Embedded Systems with IoT workshop, and multiple technical paper presentations. Eager to develop industry-relevant VLSI skills and contribute to semiconductor and electronics projects.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

Annapoorana Engineering College, Salem, Tamil Nadu | 2023 – 2027 | **CGPA: 8.125**

TECHNICAL SKILLS

- Digital Electronics & Digital Logic
- Verilog HDL
- VLSI Fundamentals
- Embedded Systems
- Internet of Things (IoT)
- Microcontrollers & Sensors
- Basic Python Programming
- Communication Systems

INTERNSHIP EXPERIENCE

Industrial Internship – Thermal Power Plant

- Gained practical exposure to industrial electrical and electronic systems.
- Observed power generation, control, monitoring, and protection processes.
- Developed understanding of real-time industrial equipment and safety practices.
- Connected academic concepts with practical industrial applications.

Industrial Internship – SS SYSTEM (FENCO), Coimbatore

- Gained practical exposure to industrial systems and workplace practices.
- Observed real-world engineering processes and technical operations.

WORKSHOPS

Embedded Systems with IoT Workshop

- Gained hands-on exposure to embedded systems and IoT concepts.
- Learned about sensors, microcontrollers, and IoT-based applications.
- Explored basic hardware interfacing and real-time data communication.

TECHNICAL PRESENTATIONS

Technical Paper Presentations

- Participated in multiple technical paper presentation events.
- Presented technical concepts and emerging technologies to academic audiences.
- Improved technical communication, presentation, and research skills.

PROJECT

Accident Detection and Alert System

- Developed an accident detection and alert system using sensors and embedded technology.
- Designed the system to detect sudden impact or abnormal motion conditions.
- Implemented an alert mechanism to notify emergency contacts during an accident.
- Focused on improving emergency response time and road safety.

AREAS OF INTEREST

- VLSI Design
- Digital IC Design
- Semiconductor Technology
- Embedded Systems
- IoT

LANGUAGES

- Tamil — Native
- English — Professional Working Proficiency
- Kannada — Spoken
