VIKASINI S

AI & Data Science Engineer | Data Analytics | Machine Learning | Full-Stack Development

Namakkal, Tamil Nadu | +91 9025341733 | vikasiniisenthilkumar52@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Final-year AI & Data Science student (CGPA: 8.32) with hands-on experience in data analytics, machine learning, and full-stack development. Completed two data-focused internships delivering EDA, dashboards, and AI automation projects. Skilled in Python, SQL, Power BI, and prompt engineering, with a track record of translating raw data into actionable business insights.

TECHNICAL SKILLS

Languages: Python, SQL

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Power BI, PostgreSQL, SQLAlchemy, Excel

AI / ML: Machine Learning, Random Forest, RAG (Retrieval-Augmented Generation), Prompt Engineering, Claude AI

Web & Full-Stack: React, Tailwind CSS, FastAPI, Axios, JWT Authentication, REST APIs

Tools & Platforms: Streamlit, Make (Integromat), GitHub, Google Cloud, Google Colab

Soft Skills: Team Leadership, Communication, Creative Thinking, Adaptability, Time Management

INTERNSHIP EXPERIENCE

Data Analytics Intern — Pluto Academy *June 2026*

Remote | Data Analytics Internship Program | 1-Month Program

- Completed a structured Data Analytics Internship involving Python-based EDA, data visualization, and business reporting across multiple real-world datasets.
- Delivered end-to-end analysis projects covering data cleaning, statistical exploration, dashboarding, and stakeholder-ready reporting.
- Built and published reproducible Python notebooks and Power BI dashboards, with all work version-controlled and documented on GitHub.

AI Automation & Intelligent Solutions Intern — IBM SkillsBuild (AICTE | BharatCares) *June 2026 - July 2026*

AICTE | IBM SkillsBuild | BharatCares Program

- Completed the AICTE-IBM SkillsBuild AI Automation & Intelligent Solutions Internship, gaining applied exposure to AI automation tools and intelligent system design.
- Applied prompt engineering and no-code AI principles to design automated workflows and intelligent solution prototypes.

PROJECTS

Web Scraping — Books Data Extraction *July 2026*

Tech: Python, BeautifulSoup, Requests, Pandas, Matplotlib, Seaborn, Google Colab, GitHub

- Scraped 400+ book records from books.toscrape.com using BeautifulSoup and Requests across 20 paginated pages.
- Cleaned and structured extracted data into a Pandas DataFrame and exported as CSV for further analysis.
- Visualized pricing and rating patterns using Matplotlib and Seaborn with 4 publication-ready charts.
- GitHub: github.com/vikasinisenthilkumar52-hash/CodeAlpha_WebScraping

Exploratory Data Analysis — Superstore Sales *July 2026*

Tech: Python, Pandas, Matplotlib, Seaborn, SciPy, SQL, SQLite, Google Colab, GitHub

- Performed EDA on 9,994 sales records to uncover profit, discount, and regional trends using Pandas and SciPy.
- Validated that high discounts (>20%) significantly reduce profit margins using an independent samples T-test ($p < 0.05$).
- Ran SQL queries via SQLite inside Colab to cross-validate category-level profit aggregations.

- GitHub: github.com/vikasinisenthilkumar52-hash/CodeAlpha_EDA

Sentiment Analysis — Amazon Food Reviews *July 2026*

Tech: Python, VADER, NLP, Pandas, Matplotlib, Seaborn, WordCloud, Regex, Google Colab, GitHub

- Classified 5,000 Amazon Food Reviews as Positive, Neutral, or Negative using VADER NLP sentiment scoring.
- Built a text cleaning pipeline using Regex and validated predictions against actual star ratings with 6 visualizations including word clouds and heatmaps.
- GitHub: github.com/vikasinisenthilkumar52-hash/CodeAlpha_SentimentAnalysis

Student Performance Analysis *June 2026*

Tech: Python, Pandas, NumPy, Matplotlib, Seaborn, Google Colab, GitHub

- Analyzed exam performance data for 1,000 students to identify the key factors affecting academic outcomes, including parental education and test preparation.
- Performed data cleaning, exploratory data analysis, and 5-question factor analysis, and built 6+ visualizations (box plots, heatmaps, histograms, scatter plots) to support findings.
- Segmented at-risk students using a custom scoring threshold and delivered a Principal's Report with 5 key findings and 3 actionable recommendations.
- GitHub: github.com/vikasinisenthilkumar52-hash/student-performance-analysis

E-Commerce Sales Analysis *June 2026*

Tech: Python, Pandas, Matplotlib, Power BI, Google Colab, GitHub

- Analyzed the Olist Brazilian E-Commerce dataset containing 100,000+ orders to identify sales trends, customer behavior, and regional performance.
- Performed data cleaning and exploratory data analysis, creating 6+ visualizations to analyze revenue, customer reviews, and product categories.
- Built an interactive Power BI dashboard featuring KPIs such as total revenue, total orders, average order value, top category, and peak sales period.
- Generated business insights and recommendations by identifying the highest revenue category, best-performing state, and peak sales month.
- GitHub: github.com/vikasinisenthilkumar52-hash/Ecommerce-Sales-Analysis

Smart Expense Tracker Web Application *March 2026*

Tech: Python, Streamlit, Pandas, Matplotlib, GitHub, Streamlit Cloud

- Built and deployed a full-stack personal finance app with secure login, per-user data isolation, and real-time expense analytics.
- Features include pie chart spending summaries, date-based filtering, and live deployment on Streamlit Cloud with GitHub version control.
- Live: expense-tracker-2mjtg7xmsy7soqrpqkrprt.streamlit.app

AI Email Agent *January 2026*

Tech: Make (Integromat), Claude AI, Gmail API, Web Search

- Built a fully automated AI agent that reads, researches, and replies to emails 24/7 with zero human intervention, eliminating manual email handling.
- Integrated real-time web search with Claude AI to reduce email response time to near-zero with accurate, context-aware auto-replies.
- Delivered production-ready automation connecting 3 modules (Gmail trigger -> Claude AI -> Gmail send) entirely without writing code.

EDUCATION

B.Tech — Artificial Intelligence & Data Science *Expected 2027*

PGP College of Engineering and Technology, Anna University | CGPA: 8.7 | Final Year

CERTIFICATIONS

- Data Analytics Internship — Pluto Academy (2026)
- AI Automation & Intelligent Solutions Internship — AICTE | IBM SkillsBuild | BharatCares (2026)
- Data Analytics Essentials — Cisco Networking Academy
- Introduction to Data Science — Cisco Networking Academy
- Building AI Agents Without Code — LinkedIn Learning
- Operating System Basics — Cisco Networking Academy
- Google Analytics Certificate — Google
- Google Cloud Cyber Security — Google
- AI Fundamentals with IBM SkillsBuild — Cisco
- Career Guidance — E-Cell, IIT Hyderabad

WORKSHOPS & TRAINING

- Prompt to Product — Sona College of Technology
- Website Development with Full Stack (SDLC) — Karur
- Placement Preparation Program — IIT Mumbai

LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

- Cultural Coordinator, AI & DS Department — PGP College of Engineering and Technology
- Sports (Carrom) Coordinator, AI & DS and IT Departments — PGP College of Engineering and Technology
