Nithish Ramasamy

Data Analyst — Python Developer
+91 9944906157 | nithishramasamy8@gmail.com | linkedin.com/in/nithish-ramasamy-58872132b |

Summary

Computer Science and Mathematics graduate with hands-on Data Analyst experience at Pricol Limited, where I supported customer requirement analysis and quality reporting using Excel and SAP ERP. Complement this with Python development experience from a dedicated programming internship, and applied research building an Android app and AR-based system for real-time energy insights. Comfortable moving between raw data, business stakeholders, and code — looking to bring that combination to an entry-level Data Analyst role.

Internships

Data Analyst Intern Feb 2026 – May 2026
PRICOL LIMITED *Coimbatore, Tamilnadu, India · Hybrid*

- Analyzed and reviewed customer requirement data and quality records for customer requirements using Microsoft Excel, supporting accurate tracking of implementation status across the Quality Department.
- Prepared structured Excel reports to surface trends and patterns in customer and quality data, supporting data-driven decisions for the CRA team.
- Performed data entry and record maintenance for using SAP ERP, gaining hands-on exposure to enterprise data management.
- Coordinated with [X] cross-functional team members to verify customer requirement information and monitor quality-related feedback.

Human Resources Intern May 2024 – Jun 2024
Recruiter Wings *Bengaluru, Karnataka, India · Hybrid*

- Screened and shortlisted resumes based on job requirements and role fit.
- Maintained accurate and confidential candidate records and recruitment data.
- Coordinated interview scheduling and candidate follow-ups with internal teams.

Python Programming Intern May 2024 – June 2024
Codsoft *Bengaluru, Karnataka, India · Remote*

- Developed and implemented Python scripts to solve practical programming problems, applying core data structures and logical reasoning.
- Built efficient, maintainable code using functions and file handling, improving script readability and reusability.
- Debugged, tested, and optimized multiple Python programs to improve accuracy, performance, and reliability.
- Completed all assigned tasks and projects within stipulated deadlines, demonstrating strong problem-solving and adaptability in a remote setting.

Technical Skills

Programming Language: Python, C, C++, SQL
Databases: MySQL, MongoDB
Data and Analytics Tools: Jupyter Notebook, Google Colab, Excel, Powerbi
Development Tools: Git, GitHub, VS Code, Android Studio

Projects

AR for Computational Sustainability and Energy Efficiency | *Research Project*

- Designing a system integrating Augmented Reality (ARCore) with computational sustainability models to render real-time energy usage and environmental impact as interactive AR visualizations.
- Built a data pipeline covering collection, pre processing, and feature selection, feeding models that calculate energy efficiency metrics and suggest energy-saving strategies.

Education

Christ University Bangalore, Karnataka
BSc Computer Science and Mathematics *2023 - 2026*

Certifications

Data Analyst — Mind Luster (Jan 2026)

Cloud Computing Foundations — AWS (Dec 2025)

Python for Data Science — Infosys Springboard (Sep 2024)

Programming in C — Infosys Springboard (Oct 2023)
