BALASUBRAMANIYAM P

+91 9344605050 Gmail

Linemedu , Salem

OBJECTIVE

To pursue a dynamic and growth-oriented career in a forward-thinking organization, where I can leverage my technical skills, creativity, and passion for continuous learning. I aim to solve real-world challenges, drive innovation, and contribute to impactful projects while evolving into a well-rounded professional committed to excellence and long-term success — both personal and organizational.

EDUCATION

DEGREE	BOARD	INSTITUTE	CGPA %	YEAR
BE - ECE	Autonomous	Knowledge Institute Of Technology	7.5	2026
Class XII	State Board	SRV Boys Higher Secondary School	68	2022
Class X	State Board	SRV Hi Tech Higher Secondary School	64	2020

BAJAJ ENGINERING SKILLS TRANING

Pursuing Bajaj Engineering Skills Training at SASTRA University, Thanjavur.

- BEST EMS – 4 months fully residential programme.
- Industry relevant curriculum: 70% practical & 30% theory.
- This training it has world class Industrial equipment.
- 3modules: PCB Design, SMT Assembly Line, Electronics Product Compliance Reliability.

TECHNICAL SKILLS

Programming Languages **:** C, Python

Area Of Interest **:** Web Development , Digital electronics, Embedded and IOT Design

Design Tools **:** Tinkercad, Cadence, Blynk

PROJECTS

Title : Automatic Car Wiper

Description : Developed an intelligent automatic wiper system equipped with rain sensors that detect precipitation levels, automatically activate the wipers, and dynamically adjust their speed, enhancing driver visibility and convenience during wet conditions.

Title : DC Motor Control Using RF Tag

Description : To design and implement a system that enables wireless control of a DC motor using RF (Radio Frequency) tag technology, enhancing automation and remote operation capabilities. The project aims to demonstrate secure and efficient motor control through RFID-based identification and switching, with potential applications in industrial automation and smart access systems

Title : EV SMART GUARD

Description: Developed an embedded system using Arduino, DS18B20 sensor, and L298N motor driver to monitor temperature and control fan/pump speed dynamically. Integrated LCD for real-time status and a relay- based short-circuit safeguard for system protection.

INTERNSHIP EXPERIENCE

- Completed two week internship in embedded system domain with United Soft.Tech pvt.Ltd
- Completed one month internship in VLSI design domain with Ether infotech

TECHNICAL WORKSHOP

- Attended a workshop on Cyber Security in Bannari Amman College.
- Attended a workshop on PCB Design in Knowledge Institute of Technology.
