Software Engineer with expertise in Angular, TypeScript, HTML, CSS, Bootstrap, REST APIs, and frontend application development.

Experience

Tata Communications Limited — Chennai, India
Frontend Developer — *July 2025 – June 2026*

- Developed and enhanced enterprise web applications using Angular, TypeScript, HTML, SCSS, and Bootstrap.
- Built reusable UI components, implemented new features, resolved frontend bugs, and improved application functionality.
- Integrated REST APIs, developed dynamic forms with validations, and displayed API data in responsive user interfaces.
- Contributed to the Optimus 2.0 (SD-WAN) application by modernizing legacy UI based on Figma designs, implementing new frontend features, and enhancing usability and user experience.
- Worked on telecom applications including Order Management, Raise Feasibility, IAS, SD-WAN, and SASE.
- Collaborated with backend developers and UI/UX teams in an Agile environment using GitLab for version control and Jira for task tracking.

BridgeLabz Solutions LLP — Chennai, India
Associate Software Engineer Fellow — *Feb 2025 – July 2025*

- Completed an intensive software engineering fellowship focused on Core Java, SQL, Angular, and Object-Oriented Programming.
- Developed Java and Angular applications while practicing Git, debugging, and Agile software development.

Education

SRM Institute of Science and Technology (Kattankulathur) — Chennai, India
Bachelor of Technology (B.Tech.) in Computer Science Engineering — *2021 – 2025*
***Specialization**: Information Technology* - 7.98 CGPA

Technical Skills

Programming Languages	: Java, JavaScript, TypeScript, SQL
Frontend Technologies	: Angular, HTML5, CSS3, SCSS, Bootstrap
Web Technologies	: REST APIs, JSON, Responsive Web Design
Tools & Platforms	: Git, GitLab, GitHub, VS Code, IntelliJ IDEA, Chrome DevTools, Jira, Notepad++

Projects

Google Keep Clone | *Angular, TypeScript, HTML5, CSS3*
Built a Google Keep-inspired note-taking application with create, edit, delete, search, and note management features using reusable Angular components and responsive design.

Dual Role Bookstore Application | *Angular, TypeScript, Bootstrap, REST API, JSON Server*
Developed a role-based bookstore application with separate Admin and Customer modules featuring inventory management, CRUD operations, book purchasing, and responsive UI using Angular.

Accomplishments

AWS Academy Cloud Operations| AWS Academy Graduate
Completed the AWS Academy Cloud Operations program, building a strong foundation in cloud computing, AWS services, and operational management.

AWS Academy Machine Learning Foundations | AWS Academy Graduate
Earned the AWS Academy Machine Learning Foundations certification, developing a strong understanding of machine learning fundamentals.

Coincent | Web Development
Earned a Coincent Web Development certification with practical training in creating responsive and interactive websites.
