RINTHIYA VIJAYAKUMAR

Salem, Tamil Nadu, India | +91 9159734091 | v.rinthiya64@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and motivated 2025 Bachelor of Engineering graduate in Electronics and Communication Engineering with a CGPA of 8.18/10 and a strong foundation in Java, MySQL, HTML, CSS, Power BI, and Tableau. Demonstrates practical project exposure in system development, real-time monitoring, data recording, visualization, and technology-based problem solving. Experienced through academic and industrial project activities in applying technical concepts, analyzing system behavior, supporting reliable implementation, and presenting data-driven insights. Adaptable and quick to learn new technologies, with strengths in problem solving, collaboration, communication and time management. Seeking an entry-level opportunity to apply my technical knowledge and contribute effectively to organizational goals.

CORE COMPETENCIES

- Quality Assurance Fundamentals
- System Development
- Real-Time Monitoring
- Problem Solving
- Data Analysis
- Data Visualization
- Database Management
- Application Testing Mindset
- System Reliability Focus
- Technical Documentation
- Cross-functional Collaboration
- Communication Skills
- Adaptability
- Quick Learning
- Time Management
- Event Coordination
- Leadership
- Creative Content Development

PROJECT EXPERIENCE

Soldier Health & Location Monitoring System **Academic Project**

Java — GPS — GSM — LM35 — LDR

- Developed a monitoring system using Java and integrated GPS and GSM modules for real-time transmission of soldier location coordinates during field operations.
- Implemented continuous temperature and heartbeat sensing using LM35 and LDR sensors to support health monitoring and timely status alerts.
- Integrated automated SMS alerts to transmit location and health-status information to command units during critical situations.
- Applied system-development and problem-solving skills to combine location tracking, health sensing, communication, and alert mechanisms in one monitoring solution.
- Focused on reliable real-time monitoring and timely information transmission to support operational awareness and emergency response.

Driver Alert Monitoring System **Academic Project**

HTML — CSS — SQL — Arduino — Eye-Blink IR Sensor

- Developed a driver-alert monitoring solution using HTML, CSS, SQL, Arduino, and an eye-blink IR sensor to identify prolonged blink duration and fatigue symptoms.
- Implemented real-time monitoring of eye activity to identify drowsiness conditions and support early driver-alert responses.
- Integrated automated buzzer activation and motor cut-off mechanisms to reduce reaction delays during detected drowsiness conditions.
- Applied an Arduino-based control mechanism to continuously monitor eye activity and provide immediate alarm feedback.
- Reported 90% system reliability within the project through the implemented monitoring and control mechanism, based on the project source material.

Cloud Integrated Data Recording and Visualization for Electric Vehicles **Industrial Project**

BMS — ESP8266/ESP32 — I2C — MySQL — Power BI

- Developed an EV battery monitoring system to collect real-time cell voltage, stack voltage, temperature, current, and other battery parameters using BMS and ESP8266/ESP32.

- Integrated I2C communication with MySQL for data storage and Power BI for monitoring and visualization of battery performance information.
- Implemented real-time monitoring of State of Charge (SoC), State of Health (SoH), safety status, and fault conditions.
- Applied data recording and visualization concepts to support battery performance analysis and safety monitoring.
- Combined embedded-system data collection, database management, and BI visualization to create a structured monitoring workflow for electric-vehicle battery information.

CERTIFICATIONS & TRAINING

- **Full Stack Developer – VCODEZ:** Hands-on exposure to Java, SQL, and web technologies through full-stack application development.
- **Industrial Project Experience – IVW:** Gained real-time experience in system development and practical implementation.
- **National Institute of Ocean Technology:** Completed a real-time project focused on system development and integration.
- **Data Analytics – NOVI Tech Platform.**

TECHNICAL SKILLS

- **Programming Language:** Java
- **Database:** MySQL, SQL
- **Web Technologies:** HTML, CSS
- **Data Visualization & BI:** Power BI, Tableau
- **Project Technologies:** GPS, GSM, LM35, LDR, Arduino, Eye-Blink IR Sensor, BMS, ESP8266/ESP32, I2C
- **Professional Skills:** Problem Solving, Adaptability, Quick Learning, Collaboration, Communication Skills, Time Management

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering **2021 – 2025**
Jerusalem College of Engineering, Chennai *CGPA: 8.18 / 10*

ACHIEVEMENTS & LEADERSHIP

- Executive Member of Association of ECE.
- Secured second place in Intra-department Mini Project Expo.
- Served as School Pupil Leader, demonstrating leadership and event-management involvement.
- Created engaging content and creative materials for department events and student activities.

LANGUAGES

- Tamil
- English
