Salem, Tamil Nadu

CAREER OBJECTIVE

Engineering graduate (2022, CGPA **8.30**) with a strong foundation in Python, C and Java. Built a secure e-voting system combining machine learning and blockchain as my final-year project. Looking for an entry-level software development role where I can apply my programming and problem-solving skills, keep learning, and contribute to real products.

ACADEMIC PROJECT

Secure E-Voting System using Machine Learning and Blockchain

Final-year project, B.E. — 2022

- **Problem:** traditional and online voting systems are open to tampering, duplicate votes and loss of voter trust.
- **Tamper-proof records:** stored each vote as a transaction on a blockchain ledger, so cast ballots cannot be altered or deleted after submission.
- **ML-based verification:** applied machine learning to strengthen voter verification and flag suspicious or duplicate voting activity.
- **Transparent results:** votes can be counted and audited from the ledger without exposing individual voter choices.
- **Built with:** Python, machine learning libraries and a blockchain framework.

EDUCATION

Bachelor of Engineering (B.E.)

CGPA 8.30/ 10 — Graduated 2022

DECLARATION

I hereby declare that the information given above is true and correct to the best of my knowledge.

Place: Salem
Date:

Priya Dharshini S

TECHNICAL SKILLS

PROGRAMMING
Python · C · Java (basics)

WEB
HTML

CONCEPTS
Machine learning · Blockchain · Object-oriented programming

AREAS OF INTEREST

- Software development
- Machine learning
- Blockchain applications

STRENGTHS

- Quick learner
- Analytical problem solving
- Teamwork and communication
- Consistent academic record
