PROFESSIONAL SUMMARY

Motivated and detail-oriented **PHP Developer** with hands-on experience in designing, developing, and maintaining scalable web applications. Proficient in **Spring Boot, RESTful APIs, and database-driven systems** with a strong foundation in backend logic, API integration, and microservice architecture. Adept at collaborating with cross-functional teams, debugging complex issues, and optimizing system performance. Passionate about clean, maintainable code and continuous learning in modern PHP technologies.

TECHNICAL SKILLS

- **Programming Languages:** PHP
- **Databases:** MySQL, SQL
- **Web Technologies:** HTML, CSS, RESTful APIs, JSON , Javascript
- **Version Control:** Git, GitHub
- **Other Skills:** Problem Solving, Debugging

WORK EXPERIENCE

Software Engineer

Redmind Technologies - Namakkal — Apr 2024 - Mar 2025

- Designed and implemented backend modules for **World Wide Pharma**, optimizing **CRUD** operations using **PHP and MySQL**.
- Enhanced backend scalability by refactoring legacy code into modular, reusable components.
- Collaborated with frontend developers to ensure **seamless API integration** and improve overall UX.
- Built custom data validation and reporting modules that reduced manual data errors by 30%.
- Participated in **code reviews** and contributed to establishing coding standards for the team.

Projects

WorldWide Pharma (Web Development) - PHP, MySQL, HTML, CSS

- Developed and maintained core modules like **CRM, reward points, and inventory management** using PHP and MySQL.
- Designed **responsive and user-friendly web interfaces**, ensuring seamless user experience across devices.
- Improved **backend efficiency and data handling** through optimized queries and clean coding practices.
- Collaboratedwithcross-functionalteams to ensure **smooth integration** between frontend and backend systems.

Emerging Engineer

Mulecraft India Private Limited - Salem — July 2023 - Jan2024

- Designed and integrated **REST APIs** using Anypoint Studio and RAML.
- Implemented **CRUD operations** and client ID enforcement for secure API management.
- Conducted **API testing and validation** using Postman for quality assurance.
- Assisted in **optimizing API workflows**, improving response time, and troubleshooting integration issues.

INTERNSHIP

Java Backend Development - GeeksforGeeks — Aug 2025 – Nov 2025

Completed Java backend internship learning **Spring Boot, REST APIs, databases,** and Postman API testing.

EDUCATION

Bachelor of Engineering in Computer Science

Paavai Engineering College - Namakkal — Aug 2019 - May 2023

- CGPA: 7.85
