PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in frontend, full-stack, and security-focused application development using JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, and RESTful APIs. Built responsive web applications with JWT authentication, role-based access control, server-side validation, audit logging, real-time communication, API integration, and modular component architecture. Hands-on exposure to SIEM-based security monitoring, vulnerability assessment, web application security, Linux/Windows log analysis, and security-event investigation. Experienced with Git, Agile/SDLC, Postman, debugging, and AI API integration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, Bash, PowerShell

Frontend: React.js, Next.js, Redux Toolkit, Context API, React Router, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, Django REST Framework, Flask, FastAPI, RESTful APIs, Socket.IO

Databases: MongoDB, Mongoose, PostgreSQL, MySQL, SQLite, Redis

Authentication & Security: JWT, OAuth 2.0, bcrypt, RBAC, Authentication, Authorization, Server-Side Input Validation, Audit Logging

Cybersecurity: SIEM, Wazuh, Splunk, Wireshark, Nmap, Burp Suite, Nessus, OWASP Top 10, MITRE ATT&CK;, NIST CSF, Snort, Suricata

Systems & Networking: Linux, Windows, Active Directory, Kali Linux, TCP/IP, DNS, DHCP, VLAN, VPN, NAT, Subnetting

Development & Testing: Git, GitHub, SDLC, Agile, Postman, Jest, React Testing Library, Debugging, REST API Design

Deployment & AI: Vercel, Render, Cloudinary, Claude API, OpenAI API, Gemini API, n8n

SELECTED PROJECTS

DevConnect — AI Code Review & Collaboration Platform

React.js, Node.js, Express.js, MongoDB, Socket.IO, Claude API, JWT

- Architected a full-stack collaboration platform with JWT authentication and refresh-token rotation.
- Developed RESTful APIs with role-based access control across 15+ protected endpoints.
- Integrated Claude API for AI-powered code review and Socket.IO for real-time, room-based messaging.

MultiVendor E-Commerce Platform

React.js, Node.js, Express.js, MongoDB, Socket.IO, Cloudinary, JWT

- Developed a multi-vendor marketplace with JWT-protected role-based routes for Users, Vendors, and Admins.
- Implemented Cloudinary-based multi-image uploads and administrator approval workflows.
- Added real-time order monitoring using Socket.IO.

Secure Employee Service & Incident Management Portal

React.js, Node.js, Express.js, MongoDB, JWT, bcrypt

- Developed a full-stack employee service and incident-management portal using React.js, Node.js, Express.js, and MongoDB.
- Built RESTful APIs with JWT authentication, role-based access control, server-side input validation, and centralized error handling.
- Implemented ticket lifecycle management, incident reporting, search/filtering, and responsive dashboards.
- Added audit logging for role changes and security-incident updates with actor and timestamp information.
- Tested API endpoints using Postman and followed Git-based development and debugging practices.

SOC Monitoring & Incident Investigation Lab

Wazuh / Splunk, Windows/Linux, Wireshark, MITRE ATT&CK;

- Deployed a SIEM-based security monitoring environment and collected Windows/Linux security logs for centralized analysis.
- Configured and analyzed security alerts related to authentication, network, and security events.
- Investigated security alerts/events using log correlation and event analysis; mapped investigated events to relevant MITRE ATT&CK; techniques.
- Documented incident findings, indicators, investigation steps, severity, and recommended remediation actions.

Web Application Vulnerability Assessment Lab

Burp Suite, Nmap, Nessus, OWASP Top 10, OWASP Juice Shop/DVWA

- Conducted vulnerability assessment of a deliberately vulnerable web application using Nmap, Burp Suite, and Nessus where applicable.
- Analyzed HTTP requests/responses and application behavior using Burp Suite to validate vulnerabilities.
- Prepared findings with reproduction steps, evidence, risk descriptions, and remediation recommendations.

AI Job Hunter — n8n Automation Pipeline

n8n, OpenAI GPT-4o API, Apify, Google Sheets

- Designed a 50+ node n8n automation workflow for job scraping, ATS scoring, resume rewriting, and application tracking.
- Integrated OpenAI GPT-4o API for automated resume analysis and rewriting.
- Connected Apify and Google Sheets to support job-data collection and application tracking.

EXPERIENCE

Frontend Development Intern — IntrainEduTech

- Developed and maintained frontend UI components using HTML5, CSS3, and JavaScript.
- Built reusable, modular UI components with responsive layouts.
- Followed Agile and software development practices to meet delivery targets.

CERTIFICATIONS

Fortinet Certified Professional (FCP) — Cybersecurity | Fortinet

Fortinet Certified Associate (FCA) — Cybersecurity | Fortinet

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

V.S.B Engineering College, Karur — Anna University

2021–2025 | **CGPA: 7.3 / 10**
