CAREER OBJECTIVE

A motivated and digital-oriented computer science and engineering student with a strong foundation in Java Programming and Data Analytics , AI Tools and Technologies, Full Stack Development . Possess foundational Knowledge of Programming, SQL, Power BI , Git, github and web technologies .Eager to apply technical and analytical skills to solve real-world problems, develop innovative solutions ,and contribute to organizational growth while continuously learning emerging technologies and enhancing professional skills

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering
Vivekanandha College of Technology for Women | Year: 2023 – 2027
CGPA: 7.91

TECHNICAL SKILLS

Programming Languages**:** HTML5, CSS3, Core Java, python, SQL, javascript
Web & Mobile Engineering: Web Application Development, Android App Development, UI/UX Design
Tools& Database: Git & GitHub (Basics) ,Google Colab, Docker, VS Code, MongoDB Atlas.
Office Tools: MS Word, Excel, Power Point.
Basic Debugging & Logical Problem Solving.

CERTIFICATIONS & AWARDS

- Data Analytics – Novi tech R&D Pvt Ltd
- Full Stack Development -- Novi tech R&D Pvt Ltd
- AI-Fundamentals—IBM

Power BI Using AI – Workshop Way2Me | Oct 2024

- Participated in a one-day workshop on Power BI fundamentals
- Learned basics of data visualization and AI-assisted insights
- Gained exposure to real-world use of Power BI for analysis

INTERNSHIPS

Generative AI| AdroIT Technologies Innovative Solutoins.

- Successfully completed an internship training program on Generative AI (Gen AI)
- Gained exposure to Generative AI concepts and related technologies.
- Focused on learning and skill development.

AI&ML using python| Code bind technologies.

- Completed an internship focused on AI &ML using python.
- Gained exposure to python programming and AI & ML concepts.
- Developed projects of Machine learning and their real-world applications.

PROJECTS

Event Registration Website

- Developed a Flask-based Event Registration Website for managing online event registrations.
- Implemented user registration, event/course selection, and database integration features.
- Designed an admin panel to manage participant and event details efficiently.

IOT – Based Anti-Theft System

- Developed an IoT-based anti-theft security system using sensors and microcontrollers.
- Implemented real-time alert and monitoring features for theft detection.
- **I**mproved safety and security through automated tracking and notification system.
