PROFESSIONAL SUMMARY

Computer Science and Engineering student with a strong foundation in JavaScript, HTML, CSS, Java, Data Structures and Algorithms, OOP, DBMS, and SQL. Experienced in developing web applications using modern web technologies, client-side scripting, Java, and MySQL. Familiar with DOM manipulation, Web APIs, REST APIs, JSON, responsive web development, and Git/GitHub. Interested in building scalable, user-focused frontend applications and solving analytical programming problems.

PROFESSIONAL EXPERIENCE

EduSkills, *Java Full Stack Developer Intern* 01/2026 – 07/2026 | Remote

- Developed and optimized web applications using Java, OOP, DSA, HTML, CSS, JavaScript, and MySQL.
- Implemented database operations and backend functionality using SQL and Java, with focus on reliable and maintainable solutions.
- Collaborated on project tasks, managed multiple activities, prioritized requirements, and applied problem-solving and adaptability in a fast-paced environment.

EduSkills, *AI / Machine Learning Intern* 03/2025 – 05/2025 | Remote

- Worked with Python to clean, organize, and prepare structured datasets for analysis and machine learning applications.
- Assisted with model training, testing, evaluation, and data preparation while following project requirements and timelines.
- Applied analytical thinking, problem-solving, adaptability, and attention to detail while working collaboratively on machine learning tasks.

PROJECTS

Vehicle Service & Maintenance System, *Java,JSP,JDBC,MySQL,MVC,DAO,OOP*

- Developed a full-stack Java web application using Jakarta EE, Servlets, JSP, JDBC, and MySQL, following MVC and DAO design patterns to implement modular vehicle, booking, inventory, and customer management workflows.
- Engineered secure backend functionality with Servlet Filters, session management, role-based access control, credential validation, and SHA-256 password hashing, protecting administrator routes and user data from unauthorized access.
- Implemented core business logic and database operations for appointment scheduling, mechanic assignment, spare-parts inventory, automated invoice generation, payment tracking, and customer feedback, with MySQL relational database integration and CSV-based reporting.

AI-Based PCOS Detection System Using Deep Learning, *Python, TensorFlow, Keras, CNN*

- Developed a PCOS detection system using ultrasound images and 10 clinical parameters, achieving 92% diagnostic accuracy.
- Built a CNN-based image classification model using Keras, achieving a 0.89 F1-score on the validation dataset.
- Combined ultrasound image features with clinical parameters to improve PCOS detection precision by 18% compared with the baseline approach.

TECHNICAL SKILLS

Programming Languages
Java, Python, C, SQL

Web Technologies
HTML5, CSS3, JavaScript, Responsive Web Design, DOM Manipulation

Core Computer Science
DSA, Object-Oriented Programming (OOP),DBMS, Operating System, Computer Fundamentals

Developer Tools & Databases
Git, GitHub, VS Code, MySQL, MySQL Workbench

CERTIFICATIONS

- Microsoft Certified: SQL AI Engineer Associate (DP-800)
- Oracle Cloud Infrastructure 2025 – AI Foundations Associate
- IBM SkillsBuild – Data Analytics and AI

EDUCATION

B.E. Computer Science and Engineering, *K.S. Rangasamy College of Technology* 2023 – 2027 | Namakkal, Tamil Nadu
CGPA: 7.87 / 10

Higher Secondary Education (12th), *Vani Vidhyalaya Matriculation Hr.Sec.School* 2022 – 2023 | Namakkal,Tamil Nadu
Percentage: **80.5%**
