PROFESSIONAL SUMMARY

Curious and adaptable learner passionate about emerging technologies, with hands-on experience in full-stack development and strong problem-solving skills. Interested in building reliable, scalable software solutions and applying technology to solve practical business problems.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript
Full-Stack: MERN Stack (MongoDB, Express.js, React, Node.js)
Databases: MySQL, MongoDB
Core Concepts: Object-Oriented Programming (OOP), DBMS, Data Structures, Computer Networks, Operating Systems, Software Development Life Cycle (SDLC) and Basic Cloud Concepts
Tools: GitHub, Postman, Power BI
Generative AI: Claude, Model Context Protocol (MCP), AI-assisted Development

EXPERIENCE

Trainee Associate Web Developer | Calanjiyam Consultancies and Technologies, Erode **Feb 2026 – Aug 2026**

- Developed and maintained a MERN-based Matrimony portal supporting 100+ concurrent users, implementing RESTful APIs, JWT authentication, RBAC, CRUD operations, MVC architecture, with mongoDB indexing and optimized queries for efficient transaction processing.
- Built and enhanced a MERN-based ERP application with 15+ business workflows, designing reusable APIs, modular components, and database structures to improve maintainability and support scalable application development. Optimized application performance through API-level validation, asynchronous operations, efficient MongoDB queries, and modular architecture, while gaining hands-on exposure cloud deployment for scalable application delivery.

PROJECTS

IT Support System | MERN Stack | Model Context Protocol (MCP) | Groq LLM API | Multi Agent Routing|
Live: https://it-support-1-iigs.onrender.com

- Architected an AI-powered IT Support platform utilizing a Multi-Agent Swarm (Triage & Specialist agents) to autonomously process natural language employee requests and automate IT resolution workflows.
- Implemented a secure, custom Model Context Protocol (MCP) server to safely expose internal tools to the AI, enabling dynamic MongoDB ticket creation, real-time SMTP alerting, and an Admin Dashboard for seamless human-in-the-loop oversight.

Expense Tracker App | React, Node.js, MongoDB, Claude, MCP | Live: expense-tracker-app-4eb1.onrender.com

- Created a full-stack personal finance application with an analytics dashboard, interactive expense charts, transaction management, and monthly budgeting. Integrated a local AI agent powered by Claude using the Model Context Protocol (MCP), connecting the AI to the application's data and tools. Tested REST APIs with Postman; deployed on Render.

Vin's Art Hunt – E-Commerce Platform | MERN Stack | Live: vins-art-hunt.onrender.com

- Built a responsive React UI using Hooks, React Router, and Context API for cart state with localStorage persistence; implemented UPI checkout. Developed RESTful APIs with Express.js and Mongoose on MongoDB; deployed on Render with environment-based configuration.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering **May 2022 – May 2026**
K. S. Rangasamy College of Technology | CGPA: 8.54/10

PUBLICATION

- Ecosmart Distributed Warehouse Inventory and Predictive Route Management System. *Proceedings of the IEEE International Conference on Computing Theory and Wireless Communications (ICCTWC)*, 2026.
  DOI: 10.1109/ICCTWC68241.2026.11583265

ACHIEVEMENTS

- Ranked 4th among participants in the ABB Hackathon 2025.
- Co-authored *Voice of Heart*, published by Let's Write Publication.
- Vidyadhan scholarship holder

CERTIFICATIONS

- Anthropic – Claude 101
- NPTEL – Problem Solving through Programming in C
- Infosys Springboard – Java Developer Certification
- Udemy – MERN From Scratch | eCommerce Platform
