Summary

Motivated and analytical B.Tech student in Artificial Intelligence and Data Science (graduating in 2026) with a strong foundation in Python, SQL, and data analytics tools. Certified with a diploma in data analytics and experienced through an internship at Vislona, applying data-driven insights to real-world business problems. Fluent in English and skilled in visualization, AI concepts, and business intelligence. Also a proactive founder of startup LaunchSpring, demonstrating leadership, innovation, and problem-solving abilities in tech-driven environments.

Skills

Tools:Python,SQL,Power BI, Excel (Advanced), Tableau, Google Analytics, Pandas, NumPy, Matplotlib, Machine Learning Tools (Scikit-learn, TensorFlow basics).

Hard Skills: Data Cleaning, Preprocessing, Data Visualization, Reporting, Statistical Analysis, Predictive Modeling, AI, Machine Learning Fundamentals, Database Management, Business Intelligence, Problem Solving, Analytical Thinking.

Soft Skills: Leadership and Team Collaboration, Communication (Fluent English – written and spoken), Critical Thinking, Adaptability Fast Learning, Time Management, Project Ownership, Creativity, Innovation.

Experience & Certification

Junior Data Analytics Intern – Vislona May 2025 – July 2025

- Assisted in collecting, cleaning, and analyzing large datasets using Python and SQL to generate actionable business insights.
- Created dashboards and data visualizations in Power BI and Excel to track key performance metrics.
- Supported predictive modeling tasks and trend analysis for improving product and marketing decisions.
- Collaborated with the senior analytics team to automate reporting workflows, improving data accuracy and efficiency.

Business Analytics Intern – MCholas May 2026 – July 2026

- Conducted market research and competitor analysis to support business strategy opportunities.
- Analyzed business data using Microsoft Excel and prepared reports to support operational and management decisions.
- Collaborated with cross-functional teams to collect, organize, validate, and analyze business data, ensuring data accuracy and supporting reporting and strategic decision-making.
- Leveraged AI-powered tools to automate business research, documentation, and workflow processes, improving operational efficiency and team productivity.

Diploma in Data Analytics Certification

- Trained in end-to-end data analytics processes including data cleaning, visualization, and reporting.
- Proficient with Power BI, Tableau, and Excel for creating interactive dashboards and business insights.
- Conducted hands-on projects focused on statistical analysis, forecasting, and decision-making through data-driven methods.

SQL for Data Analytics with AI Certification

- Mastered advanced SQL queries, joins, subqueries, and data manipulation techniques for analytical solutions.
- Integrated AI-driven methods to enhance data processing, trend analysis, and business intelligence.
- Designed and optimized data models for reporting and visualization using AI-supported analytics tools.

Master Data Science Course – IITM Pravartak Certification

- Gained hands-on experience in Python, Machine Learning, AI concepts, and real-world data projects guided by IIT Madras Pravartak experts.
- Acquired in-depth knowledge of Python programming, Machine Learning algorithms, and Artificial Intelligence applications.
- Completed multiple real-world, industry-oriented projects under IIT Madras Pravartak guidance.
- Developed predictive models and automated data pipelines to extract actionable insights from complex datasets.

Projects

SACE – AI-Powered Style Suggestion Platform

- Core AI Integration: Analyze user photos and generate specific hairstyle, outfit, and accessory recommendations using the Face++, Gemini API, and Gemini API.
- Monetization & E-commerce: Implement a token-based usage system for platform access. Link recommendations directly to relevant products using affiliate product mapping.
- Privacy & Personalization: Ensure user data privacy with workflows designed for automatic photo deletion. Provide personalized recommendations with gender-specific suggestions.

Data-Driven Stock Analysis

- Stock Analysis System: Developed a comprehensive stock analysis system using Python, Pandas, SQL, Power BI, and Streamlit.
- Real-time Data Processing: Built a data pipeline to collect and clean real-time market data for identifying key financial trends.
- Statistical Analysis & Insights: Performed statistical analysis to generate actionable investment insights from financial data.
- Interactive Dashboards: Created dynamic and interactive dashboards with Power BI and Streamlit to visualize stock performance and market behavior.

Client Query Management System

- Web-Based Client Query System: Developed a full-featured system using Python, Streamlit, and MySQL for efficient client query management.
- Query Management Features: Implemented core functionalities for submitting, viewing, and managing client queries effectively.
- Database Integration: Utilized MySQL to ensure secure and organized storage and retrieval of all client information and queries.
- User-Friendly Interface: Designed and developed an intuitive, user-friendly interface to ensure smooth operations and a seamless user experience.

Education

TJS Engineering College — Puduvoyal, India
B.Tech Artificial Intelligence and Data Science (CGPA: 8.4/10) — *2022 – 2026*

Vidya Mandir Matric Higher Secondary School — Ponneri, India
12th State Board (50.17%) — *2021 – 2022*

ST. JOHN'S Matriculation School — Ponneri, India
10th State Board (76.20%) — *2019 – 2020*
