CAREER OBJECTIVE

Final-year B.Sc. Computer Science (Artificial Intelligence & Data Science) student with a growing foundation in Python and Java, along with hands-on experience building AI-based projects and exposure to real-world data analytics and mobile application development through internships. Seeking an entry-level Software Developer role to apply strong programming fundamentals and grow as a software professional.

TECHNICAL SKILLS

Programming: Python (Learning), Java (Learning)

Libraries/Tools: Pandas, Scikit-learn

PROJECTS

AI-Based Movie Recommendation System

Developed a personalized movie recommendation system using collaborative filtering to address information overload on digital media platforms.

Worked with the MovieLens small dataset (~100,000 ratings from 600 users across 9,000 movies) and used Pandas for data manipulation and handling the sparsity of the user-item rating matrix.

Implemented and compared KNN-based approaches (user-user and item-item similarity) for memory-based filtering with Singular Value Decomposition (SVD) for model-based matrix factorization using the Scikit-learn Surprise library.

Applied SVD to uncover latent factors such as hidden genre preferences, enabling predictions even for user-movie pairs with no direct interaction history.

Evaluated model performance using RMSE and MAE to ensure reliable and accurate rating predictions.

INTERNSHIPS

Data Analytics Intern — Techvolt (January 2026)

Completed an internship focused on data analytics, working with real-world datasets.

Gained practical exposure to data analysis techniques and reporting.

Mobile App Development Intern — Zen1 Techpark (June 2026)

Completed a Mobile App Development internship.

Gained practical exposure to mobile application development concepts and workflows.

EDUCATION

B.Sc. Computer Science (Artificial Intelligence & Data Science) — Final Year (Pursuing)

VET Institute of Arts and Science

Higher Secondary (12th): 64% (2023–2024)

SSLC (10th): 72% (2021–2022)

CERTIFICATIONS

Certified Python Developer (Basic Level) — MSME Technology Development Centre, Chennai (CFTI), Govt. of India; completed a structured training program covering Python fundamentals, data structures, and problem-solving techniques.

Android Development Workshop — Rubrich Technologies, Coimbatore; hands-on workshop covering the fundamentals of Android app development and mobile UI design.
