PROFILE

Mechanical Engineering undergraduate with a strong foundation in CAD design, product development, and engineering design principles. Demonstrates proficiency in analytical thinking, problem-solving, and transforming engineering concepts into practical solutions. Committed to continuous learning in mechanical design, manufacturing, and emerging technologies, with the ability to contribute effectively to product development, design optimization, and innovative engineering projects.

EDUCATION

Knowledge Institute of Technology (KIOT), Salem – B.E. Mechanical Engineering | CGPA: 7.5 **2023-Present**
Skt Matriculation Higher Secondary School, Poolampatti - 12th : 67.1% **2022 – 2023**
Skt Matriculation Higher Secondary School, Poolampatti - 10th : Pass **2020**

EXPERIENCE

E-Baja & M-Baja | SAE India **Nov 2025 – Jan 2026**

- Assisted in prototype fabrication, assembly, and manufacturing operations, ensuring compliance with engineering drawings and quality standards.
- Contributed to Research & Development (R&D) through CAD-based design optimization, component development, and product aesthetics enhancement.
- Performed functional testing, performance validation, root cause analysis, and technical documentation to support product development and design improvements.

PROJECTS

Hospital asset tracking and smart patient flow Management system **Jul 2026**

- Developed a smart system to track hospital equipment and patient movement.
- Helped improve patient flow and reduce waiting time within the hospital.
- Supported efficient asset management and better hospital operations.

Urban tragic aware delivery route optimization **April 2026**

- Developed a route optimization system for efficient urban delivery operations.
- Identified shorter and less congested routes to reduce travel time and fuel consumption.
- Improved delivery efficiency by considering traffic conditions and route planning.

Al-Based Posture Correction System **Jan 2026**

- Developed an AI-based posture correction system to monitor body posture in real time.
- Detected incorrect sitting and standing positions and provided posture correction alerts.
- Improved awareness of proper posture to support better ergonomics and reduce strain.

Passive Cooling **2025-2026**

- Designed a non-electric cooling solution to reduce indoor heat levels.
- Utilized thermal insulation materials and airflow principles for temperature regulation.
- Built a prototype demonstrating sustainable indoor cooling performance.

ACHIEVEMENT

Contributed to Team KIOT BAJA, achieving AIR 1 (All India Rank 1) and winning the Overall Championship at BAJA SAEINDIA Southern Championship 2026. Earned 1st Place in Maneuverability, 1st Place in Suspension, and a total cash prize of ₹1.40 lakh through excellence in vehicle design, testing, and competition performance.

SKILL

- **CAD Software** : AutoCAD, SolidWorks
- **Engineering Skills** : Reverse Engineering, Product Benchmarking, Engineering Design, Technical Documentation
- **Programming Language** : Python (OpenCV).
