Nitha Nowrin A

nowrinnitha@gmail.com | +91 8072257375 | Tamil Nadu, India

Professional Summary

Motivated B.Sc. CS (AI & Data Science) undergraduate with practical internship exposure to Data Science, Machine Learning, and Cloud Computing. Passionate about building computer vision solutions and AI-powered tools, with hands-on project experience in deep learning and applied Python development.

Education

B.Sc. CS (Artificial Intelligence & Data Science) 2024 - 2027
VET Institute of Arts and Science (Affiliated College)

Higher Secondary Certificate (12th Grade) - 95% 2024
State Board School

Secondary School Leaving Certificate (10th Grade) - 80% 2022
State Board School

Internship Experience

Data Science & ML Intern — Vidhai AI Solutions 2026

- Completed a hands-on internship focused on the end-to-end data science workflow, from raw data to model-ready inputs.
- Performed Exploratory Data Analysis (EDA) to uncover trends, detect outliers, and understand feature relationships across datasets.
- Used Python libraries such as NumPy and Pandas for data cleaning, transformation, and preprocessing ahead of model training.
- Gained practical exposure to core machine learning workflows, including feature engineering and model evaluation concepts.

Cloud Computing Intern — Nobal Software 2026

- Explored core cloud computing concepts and service models — IaaS, PaaS, and SaaS — through guided, applied learning.
- Studied virtualization fundamentals and how cloud infrastructure is provisioned, scaled, and managed.
- Learned cloud deployment practices, resource management strategies, and standard cloud architecture design principles.

Projects

Deepfake Image Detection System 2026

- Designed and built a deep learning system to detect AI-generated deepfake images using TensorFlow/Keras for model development and Pillow/OpenCV for image preprocessing and manipulation.
- Trained a Convolutional Neural Network (CNN) to classify images as authentic or manipulated, focusing on identifying visual artifacts and inconsistencies typical of deepfake generation techniques.
- Built a lightweight Flask web application that lets users upload an image and instantly receive an authenticity score, making the detection model accessible through a simple real-time interface.
- Focused on balancing model accuracy with inference speed, so results could be returned to users without noticeable delay.

Smart Study Buddy 2026

- Developed an interactive, Python-based study assistant to help students plan and structure their study sessions more effectively.
- Implemented study tracking logic to log session progress and help students review core concepts consistently over time.
- Built simple NLP-based prompt structures to make interactions with the assistant feel natural and conversational.
- Designed a clean, distraction-free productivity UI aimed at keeping students focused during study sessions.

Technical & Soft Skills

Languages: Python, Java, SQL
Web Technologies: HTML, CSS
Libraries/Frameworks: Pandas, NumPy, TensorFlow/Keras, Flask
Core Concepts: OOP, Machine Learning, Deep Learning
Soft Skills: Problem Solving, Rapid Learner, Analytical Thinking, Team Collaboration

Awards

- Centum Award - Commerce and Economics, 12th Standard (State Board)

Certifications

- Python Programming Certification
- Data Science & ML Internship Certificate — Vidhai AI Solutions
- Cloud Computing Certificate — Nobal Software

Languages Known

Tamil, English, Malayalam (Basic)
