OBJECTIVE

Artificial Intelligence and Data Science undergraduate with a strong foundation in programming, machine learning, and web development. Looking for an opportunity to apply my technical knowledge, learn from real-world projects, and contribute to building meaningful and efficient software solutions while growing professionally.

EDUCATION

B.Tech – AI&DS — Kongunadu College of Engineering and Technology **CGPA:** 8.8 **2023-2027**

HSC (12th Grade) — Our Lady of Lourdes Girls Higher Secondary School **Percentage:** 90.6% **2022-2023**

SKILLS

Technical :

Programming : Java, Python

Web: HTML, CSS, JS, ReacJS

Tools: Git, VSCode, Figma

DataBase: PostgreSQL, MongoDB

Core Concepts: ML, API's, Data Analysis, RAG

Soft Skill:

Communication Skills

Teamwork & Collaboration

Adaptability & Willingness to Learn

Time Management & Prioritization

PROJECTS

1. AgroSmart – Machine Learning Crop Recommendation System

• Developed a Machine Learning-based crop recommendation system using soil nutrients, pH, rainfall, temperature, humidity, and location data.

• Preprocessed agricultural datasets with Pandas and trained a Random Forest Classifier for crop prediction.

• Integrated a Weather API to provide real-time weather information and farming alerts.

• Improved decision-making by recommending suitable crops based on environmental conditions.

Tech Stack: Python, Pandas, Scikit-learn, Random Forest, Weather API

2. Ocean Data Chatbot – Research Assistance System

• Developed an ocean data chatbot for a Smart India Hackathon (SIH) project to simplify complex oceanographic data for users.

• Processed NetCDF files by converting them into CSV format for easier analysis and data retrieval.

• Built a chatbot that provides simple and user-friendly insights from ocean datasets.

• Worked with large ocean datasets using Python and FileZilla for data processing and management.

Tech Stack: Python, NetCDF, xarray, Pandas, CSV Processing, FileZilla

INTERNSHIP

Full Stack Developer Intern — Oneyes Infotech Solutions **1Month**

- Designed responsive web interfaces using **Figma, HTML, CSS, and JavaScript**.
- Gained hands-on experience in **real-time web development projects and workflows**.

CERTIFICATIONS

Infosys Spring Board : Front End Developer

MongoDB University : MongoDB Basics

FreeCodeCamp : Responsive Web Design

Value Added Course : ML and Java

ACHIEVEMENTS

• Secured an internship opportunity through participation in the **National-Level Women's TechDivathon Hackathon**.

• Selected among the top teams at CMR HackFest 3.0 for developing **"TruthScan AI"** an AI-based deepfake detection solution.
