PROFESSIONAL SUMMARY

Final-year Artificial Intelligence and Data Science undergraduate (CGPA 8.9) with hands-on experience in Python, SQL, machine learning, and data analysis through academic projects and internships. Skilled in building and evaluating ML models using NumPy, Pandas, and Scikit-learn, with project experience spanning speech recognition and NLP-based chatbot development. Internship exposure to robotics and data analytics. Seeking an entry-level role as a Data Analyst, Data Scientist, or AI/Data Science professional.

EDUCATION

B.Tech: Artificial Intelligence and Data Science Expected in 01/2027
Kongunadu College of Engineering and Technology
GPA: CGPA: 8.9

Higher Secondary School (HSC) 01/2023
Little Flower Girls Higher Secondary School
GPA: Percentage: 86.6%

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, SQL
- **Web Technologies:** HTML, CSS
- **Machine Learning & Data Science:** Machine Learning, Data Analysis, NumPy, Pandas, Scikit-learn
- **Tools & Platforms:** Visual Studio Code

INTERNSHIP / EXPERIENCE

Data Analytics Intern 11/2025 - 12/2025
Futurewie Technology

- Learned fundamentals of data analytics and data processing, and worked with real datasets to practice data cleaning and analysis techniques.

Robotics Intern 06/2025 - 07/2025
Galwin Technology

- Gained practical knowledge of robotics systems and automation, building foundational understanding of hardware-software integration.

ACHIEVEMENTS

- 1st Prize, College Chatbot Project, Annapoorna College of Engineering.
- 2nd Prize, "Chatbot in Educational Institution" presentation, PGB College of Engineering and Technology.
- Participant, VIT Hackathon — collaborative problem-solving and technical paper presentation.

PROJECTS

Dysarthric Speech Recognition System: Built an ML-based speech recognition system to identify and interpret dysarthric speech, improving communication accessibility for speakers with motor speech disorders. Applied audio preprocessing and MFCC feature extraction (Librosa), then trained and evaluated classification models using Scikit-learn and TensorFlow. *Technologies: Python, Librosa, TensorFlow, Scikit-learn, NumPy, Pandas.*

College Information Chatbot System: Developed an NLP-based chatbot giving students instant access to college information (fees, departments, administration) via a conversational interface. Designed the conversation flow and integrated a structured JSON-based knowledge store to retrieve accurate responses in real time. Awarded 1st Prize, Annapoorna College of Engineering. *Technologies: Python, Machine Learning, JSON, Database.*

CERTIFICATIONS

- **Machine Learning & Java (Value Added Course)** — Machine learning algorithms and object-oriented programming concepts in Java.
- **HTML & CSS (Infosys Springboard)** — Fundamentals of HTML and CSS for web page development and design.
