OBJECTIVE

Motivated Electronics and Communication Engineering graduate with strong communication, problem-solving, and analytical skills, seeking to begin a career in Data Analytics. Skilled in SQL, Microsoft Excel, Power BI, Python, and basic programming, with an interest in data analysis, visualization, and deriving meaningful insights from data. Eager to apply technical knowledge and continuously develop analytical skills while contributing to data-driven decision-making in a professional environment.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering | CGPA: 8.66 — 2022 – 2026
Jansons Institute of Technology, Coimbatore

HSC | Grade: 75.2% — 2020 – 2022
KSR Akshara Academy

SSLC | Grade: 89% — 2018 – 2020
Valaraigate Vidhyalayam

SKILLS

Programming: Python, C

Data & Reporting: Microsoft Excel (Dashboard Development, Data Analysis), Power BI (Dashboard & Data Visualization), SQL (Data Querying & Analysis)

Hardware & Tools: Digital Electronics, Embedded Systems, IoT Design

Software & IDEs: Verilog, Arduino IDE, MATLAB

Technical: Microsoft Word, Microsoft PowerPoint

Soft Skills: Teamwork & Collaboration, Problem Solving, Time Management, Quick Learning Ability

Customer Support: Customer Query Handling, Complaint Resolution, Customer Relationship Management

INTERNSHIP EXPERIENCE

Protowiz — Coimbatore

- Assisted in designing, testing, and debugging embedded systems projects using relevant tools and software.
- Collaborated with the engineering team to optimize workflows and enhance project efficiency.
- Developed and documented a prototype/mini-project, contributing to improved performance and reduced testing time.

Smart DV Technologies Pvt. Ltd. — Bangalore

- Performed verification and validation of IP cores using SystemVerilog.
- Gained hands-on exposure to testbench architecture, assertion-based verification, and functional coverage.

PROJECT

Solar Energy Harvesting Driven Wireless EV Charging Station Using IoT

- Designed a solar energy harvesting-based wireless EV charging system that efficiently converts and stores solar power to enable eco-friendly, cable-free vehicle charging.
- Integrated IoT-based monitoring using ESP32 to track real-time parameters such as voltage, battery status, and charging performance, enabling data-driven, smart energy management.
