Professional Summary

Mechanical Engineering student with knowledge of manufacturing process,mechanical design. Proficient in SolidWorks, CATIA,CAM and with basic ANSYS knowledge. Gained industrial exposure through an internship at Salem Steel Plant and hands-on experience through an automatic portable cooking system project. A quick learner with strong technical and problem-solving skills, seeking to contribute to Manufacturing, Quality and Design-focused engineering roles.

Education

B.E Mechanical Engineering, *Government College of Engineering* 2023 – Present
8.0 CGPA Salem

HSC, *Sri Ramakrishna Saradha Higher Secondary School* 2023
83.7% Salem

SSLC, *Modern Matriculation Higher Secondary School* 2021
PASS Salem

Skills

Technical Skills
- SolidWorks
- CATIA V5
- Basics of ANSYS
- CAM(Computer aided manufacturing)

Quality Tools
- Six sigma
- 5S

Soft Skills
- Efficient learner
- Team player
- Effective Communication
- Time management

Workshop

Electronic Control Unit, *Government College of Erode* Erode

Emerging Trends in 3D Printing Technology, *kongu engineering college* Erode

CO-CURRICULAR ACTIVITIES

- NPTEL: Product Design and Manufacturing
- Participated in paper presentation at Kongu College of Engineering Erode and Government College of Engineering on the topic of Exhaust gas as information

Projects

Automatic Portable Cooking System
objective of designing compact, portable cooking system and automate the cooking process. Developed an Arduino-controlled automatic ingredient dispensing system using DC motors, screw mechanisms, pumps, and a portable PVC frame, achieving controlled and repeatable dispensing while reducing manual effort.

Internship

Salem Steel Plant – Internship
Gained practical exposure to industrial manufacturing processes, including hot working and cold working of steel. Observed production operations and developed an understanding of quality inspection, manufacturing practices, and real-world industrial workflows
