PROFESSIONAL SUMMARY

Aspiring Software Developer with hands-on experience in Python, Java, data structures, object-oriented programming, web development, and AI-based applications. Strong problem-solving skills with an interest in developing reliable and maintainable software solutions.

PROJECTS

Alzheimer's Detection System | Python, TensorFlow, EfficientNetB0, Streamlit **Jun 2025**

- Built an EfficientNetB0-based MRI classifier achieving 97% accuracy across four stages of Alzheimer's disease.
- Preprocessed 6,400+ MRI images using normalization, augmentation, and class-imbalance handling.
- Evaluated the model using precision, recall, F1-score, and a confusion matrix.
- Deployed a Streamlit application for real-time predictions with confidence scores.

CodeLens AI | Python, FastAPI, LangChain, GitPython, Gemini API **Jan 2026**

- Built an AI-powered code search and chat application for exploring Git repositories.
- Implemented incremental processing to update only modified files after commits.
- Developed FastAPI endpoints for code search and AI-generated explanations.
- Added data validation, API documentation, and logging to improve reliability.

Smart Leave Management System | Python, Flask, MySQL, HTML, CSS, JavaScript **Feb 2025**

- Built a web-based system for students to apply for leave and track leave requests.
- Developed a faculty approval workflow to approve or reject leave applications.
- Stored and managed student, leave, and approval records using MySQL.

SKILLS

Languages: Python, Java, SQL
AI/ML & GenAI: TensorFlow, EfficientNetB0, LLMs, LangChain, Prompt Engineering
Core Concepts: DSA, OOPs, Design Patterns, System Design
Frameworks: React.js, Node.js, REST APIs, Flask
Databases: MySQL, MongoDB
Tools & Cloud: Git, Docker, GitHub, CI/CD, AWS

EXPERIENCE

AI/ML Internship | *EduSkills | Supported by Google for Developers & AICTE NEAT* **Jan 2025**

- Built an end-to-end ML pipeline covering preprocessing, feature engineering, model training, and evaluation.
- Improved model reliability through data validation, cross-validation, and hyperparameter tuning.
- Analyzed model performance using accuracy metrics and loss curves to identify underfitting and overfitting.

EDUCATION

Paavai College of Engineering Namakkal, India
B. Tech in Artificial Intelligence and Data Science, CGPA: 8.3 / 10 Oct 2021 - May 2025

PV Matric Hr Sec School Salem, India
Higher Secondary Certificate in Biology-Maths, Percentage: 85.86% Jun 2020 - Mar 2021

PV Matric Hr Sec School Salem, India
SSLC, Percentage: 81.6% Jun 2018 - Mar 2019

CERTIFICATIONS

Software Engineering with GitHub | Microsoft
Issued on Apr 2025
AWS Cloud Essentials | Amazon Web Services
Issued on Nov 2025
