Education

K S Rangasamy College of Technology, Tamil Nadu. **November 2022 - May 2026**
Bachelor of Technology in Information Technology *CGPA-9.28*

Experience

EPAM SYSTEMS INDIA PVT. LTD. **January 2026 – June 2026**
Automation Testing Intern *Hyderabad, India*

- Engineered UI automation test scripts for web applications using Python, Selenium, and PyTest, identifying and resolving defects through systematic debugging to strengthen test coverage and reduce manual testing effort. Developed reusable test components by applying Object-Oriented Programming principles and automation framework design patterns, executed REST API testing, maintained source code using Git, and contributed within an Agile development environment.
- **Tech Stack:** Python, Selenium, PyTest, REST API

INFOSYS PVT. LTD. **October 2024 – December 2024**
Full Stack Angular Intern *Virtual*

- Designed and implemented responsive UI components for an AI-powered personalized study planner using Angular, collaborating within a 5-member cross-functional team to roll out frontend features, integrate REST APIs, and construct modules including authentication, dashboard, study planner, quizzes, and progress tracking.
- **Tech Stack:** Angular, Node.js, MongoDB

Projects

AI-Based Women Safety Analytics System | *AI/ML: Python, YOLOv8, DeepFace, MediaPipe, Streamlit, SQLite*

- Architected a modular real-time video analytics pipeline integrating YOLOv8 for person detection, a MobileNetV2-based CNN for gender classification, and MediaPipe for SOS hand-gesture recognition, feeding a rule-based risk-scoring engine that classifies scenes into five risk levels and triggers instant alerts.
- Extended the Smart India Hackathon (SIH) prototype into a full-fledged research system with a live Streamlit dashboard for incident logging and hotspot heatmap analytics; presented at **ICITSIF 2026**.

Customer Segmentation Using K-Means Clustering | *Python, Pandas, Matplotlib, PCA*

- Constructed a customer segmentation model using K-Means clustering to examine customer behavior and identify meaningful customer groups. Applied data preprocessing and Principal Component Analysis (PCA) for visualization, enabling data-driven marketing strategies and valuable customer insights.

E-Commerce Sales & Customer Behavior Analytics Dashboard | *Python, Pandas, SQL, Power BI*

- Built an end-to-end analytics dashboard on a real-world e-commerce dataset (100K+ orders, 99K+ customers, 800K+ records across relational tables), cleaning and transforming data with Python and performing business analysis using SQL queries on MySQL.
- Built an interactive Power BI dashboard with 8 key KPIs (revenue, AOV, delivery time, repeat customer rate, etc.) and 10+ visualizations covering sales trends, category/state-wise revenue, seller performance, and customer satisfaction to surface actionable business insights.

Skills and Certification

Languages: Python, Java
Database: MySQL, MongoDB
Testing & Automation: Selenium, PyTest, API Testing
Frameworks/Libraries: Angular, Node.js
Tools/Technologies: Git, GitHub, VS Code, PyCharm, Microsoft Excel, Microsoft Word, Power BI, Claude
Concepts: Object-Oriented Programming, DBMS, Automation Frameworks, Design Patterns, Data Structures & Algorithms
Certification: Microsoft GitHub Copilot Certification

Achievements And Awards

- Achieved the **Google Cloud Arcade Premium Plus Milestone** with **44 skill badges**, **19 bonus points**, and **Diamond League Milestone 3** ranking.
- Earned **Elite + Silver** certification in the **NPTEL Human-Computer Interaction** course with a score of **86%**.
- Qualified for the second round of **Hackathon MSME 3.0** with an **Automated Whistle-Controlled Induction Stove** innovation.
- Advanced to the second round of **Manas Codeathon** for designing the **Dora the Explorer** game prototype in Figma.
