SUMMARY

Cyber Security undergraduate with hands-on experience in ethical hacking, VAPT, phishing simulations, and network security. Proficient in Nmap, Burp Suite, Wireshark, and Cam Phish through authorized lab-based testing. Seeking an internship to apply technical skills, strengthen organizational security, and grow as a cybersecurity professional.

EDUCATION

Nandha Engineering College
B.E. – Computer Science & Engineering (Cyber Security), CGPA: 7.6 *2023–2027*

Sri Venkateshwara Vidhyalaya Hr. Sec. School
Higher Secondary Certificate, 76.5% *2023*

EXPERIENCE

INTERNSHIP: Cyfotok Infosec , NUX Software Solutions

Performed authorized, lab-based phishing simulations and social-engineering exercises using tools like Cam Phish to study camera-permission abuse and recognize real-world phishing tactics.
Documented reproducible impact and remediation (camera-permission hardening, user awareness, safe disclosure); followed strict, non-destructive testing in controlled environments.

TECHNICAL SKILLS

NETWORKING CYBER SECURITY FUNDAMENTALS AWS LINUX CLOUDFUNDAMENTALS
SQL EXCEL JAVA(BASICS) PYTHON(BASICS) ETHICAL HACKING (BASICS) COMMUNICATION

CERTIFICATIONS

Cisco: Introduction to Cyber Security
Coursera: Foundation of Cyber Security
Network Defense
Cyber Security and Privacy
Advanced digital forensics investigation and detection

PROJECTS

- **Phishing Awareness Simulation:**
  Conducted controlled phishing awareness simulations to assess user susceptibility and improve organizational security Awareness.
- **Integrated Keylogger with webcam and screen capture Features:**
  Developed a proof-of-concept keylogger integrated with webcam and screen capture features for ethical cybersecurity research and security awareness.
- **Blockchain-Based Secure File Sharing with Intelligent Deception System:**
  Built a blockchain-based secure file sharing system with intelligent deception mechanisms to protect sensitive data from unauthorized access**.**
