MANIKANDAN A

Software Support Engineer | Systems Troubleshooting & Technical Problem-Solving

Bengaluru, India | +91 9361124484 / +91 7339659127 | ajithmanikandan712@gmail.com | Tamil, Kannada, English | Immediate Joiner

PROFESSIONAL SUMMARY

IT Support Engineer with over a year of hands-on experience applying structured, methodical approaches to analyse and resolve technical issues across hardware, networking, and operating systems for global customers. Experienced in diagnosing root causes independently, exercising sound judgement under minimal supervision, and collaborating with cross-functional teams (vendors, end users, and support staff) to deliver reliable outcomes. Grounded in core technical fundamentals through a BTech in Information Technology, CCNA (networking), MCSA (systems administration), and a Full Stack Development program covering foundational programming and web technologies (HTML, CSS). Comfortable working to deadlines with a mid-term horizon, managing multiple tasks, and communicating clearly with technical and non-technical stakeholders alike.

CORE SKILLS ALIGNED TO ROLE

- Systematic Problem-Solving — applies structured diagnostic methods to analyse and resolve hardware, network, and OS issues
- Independent Judgement & Minimal Supervision — consistently delivers accurate, reliable resolutions with direction, not constant oversight
- Team Collaboration — works cooperatively with vendors, peers, and end users to achieve shared support goals
- Foundational Programming Exposure — HTML, CSS through Full Stack Development training (Naan Mudhalvan)
- Networking Fundamentals — CCNA (Trained); Systems Administration — MCSA (Trained)
- Windows 10 & Windows 11 — installation, configuration, and issue resolution
- Task Ownership — organises own time to meet goals set by others, adapting to shifting priorities
- Voice & Chat Technical Support across time zones, including rotational and night shifts

PROFESSIONAL EXPERIENCE

Hardware and System Engineer **Present**

Bengaluru, India

- Independently analyse and resolve hardware, networking, and OS issues for global customers, applying a structured troubleshooting methodology across each incident
- Exercise original judgement to diagnose and fix software and hardware issues on desktops, laptops, and components, including on-site replacements
- Work with minimal supervision to deliver consistent, accurate resolutions within service targets
- Manage and resolve IT service requests and incident tickets end-to-end within the internal ticketing system
- Collaborate as a team player with support staff and vendors to coordinate fixes and ensure smooth service delivery
- Organise own workload across rotational and night shifts to maintain continuous global customer coverage
- Apply strong working knowledge of Windows 10 and Windows 11 to identify and resolve system-level issues

Intern — Networking Domain **Feb 2024 – Jun 2024**

Hosur, India

- Built foundational skills in network fundamentals and applied problem-solving to networking scenarios

Intern — Web Development **Apr 2023 – Jun 2023**

Coimbatore, India

- Gained hands-on exposure to HTML and CSS, applying basic software development concepts to build web page structures

Data Entry Operator **Nov 2019 – Mar 2020**

Bengaluru, India

- Performed data entry and record-keeping tasks supporting daily operations
