Professional Summary

Computer Science undergraduate with hands-on experience in Java, Python, JavaScript, React.js, Node.js, Express.js and MongoDB through internships and full-stack development projects.Experienced in developing responsive web applications, REST APIs and database-driven solutions using Git and GitHub. Interested in building reliable and user-focused software solutions while continuously strengthening software development skills.

Education

B.E. Computer Science and Engineering **CGPA: 8.44/10**
Mahendra Engineering College

HSC – Higher Secondary 74.2%
Sri Sarada Balamandir Boys Matric Higher Secondary School

Internship Experience

Infosys Springboard 6.0 – Remote Nov 2025 – Jan 2026

- Worked on **Campus EventHub**, an inter-college event management platform for event discovery, registration and coordination.
- Developed a **3 event management modules** using the MERN stack, supporting **200+ registrations**.
- Contributed to frontend development, backend integration and application workflows for event management.

MERN Stack Intern – UptoSkill Feb 2026 – May 2026

- Developed features for **AI Mentor**, an AI-based learning and mentorship platform using the MERN stack.
- Worked with MongoDB, Express.js, React.js and Node.js to implement application functionality.
- Gained practical experience in full-stack development, API integration and database-driven workflows.

Salesforce Developer Intern – Virtual May 2025 – Jun 2025

- Completed Salesforce CRM modules covering workflow automation, reports, dashboards and object management.
- Gained practical understanding of CRM implementation and business workflow automation.

Projects

Farmora – Farm Management Platform *React.js, Node.js, Firebase*

- Developed a responsive farm management platform for real-time monitoring and farm data management.
- Implemented backend APIs, authentication and database integration for application workflows.

Campus EventHub – Inter-College Event Management Platform *React.js, Node.js, Express.js, MongoDB*

- Built event management functionality for event registration, coordination and data management.
- Developed reusable frontend components and integrated REST APIs with database workflows.

React Weather Application *React.js, JavaScript, Weather API*

- Developed a responsive web application that retrieves and displays real-time weather information through an API.
- Implemented API-based data handling for temperature, humidity, wind speed and weather conditions.

Technical Skills

Programming: Java, Python
Frontend: HTML5, CSS3, JavaScript, React.js, Responsive Design, Semantic HTML
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, MySQL, Firebase
Tools: Git, GitHub, Postman, VS Code, Figma

Certifications

- NPTEL – Programming in Java (Jan–Apr 2025)
- NPTEL – Cloud Computing (Jul–Oct 2025)
- DataCamp – GitHub Foundations (Sep 11, 2026)
- Infosys springboard – Website Creation (Jun 2025)
- MongoDB – MongoDB Basics for Students (Dec 2025)

Leadership & Achievements

- **Team Leader – TECHGENIUS:** Led the team for three consecutive years in the CATCH Hackathon, coordinating project planning, technical development and team collaboration while reaching the final round each year.
- **Technical Coordinator:** Guided junior students in HTML/CSS through hands-on explanations and real-time demonstrations.
- **Technical Content Creator:** Created and manage **Step by Step Code**, a coding-focused YouTube channel.

Soft Skills

Communication, Leadership, Teamwork, Adaptability, Time Management, Critical Thinking, Problem Solving
