

Kalaiyarasan S

401/2, Kamarajar saalai, Anthiyur, Erode - 638501
6380322851 | skalaiyarasanelex@gmail.com

Objective

Master of science in Applied Electronics graduate seeking entry-level role in EV Testing, BMS Testing, or Electronics Quality where I can apply my knowledge in electronics testing, battery systems, validation process, and quality inspection in EV manufacturing environment.

Education

- **TCM matriculation school, Sandaipettai, Erode** 2015
  SSLC
  67 %
- **Government model school chellampalayam, Erode** 2017
  HSC
  45 %
- **Sri Vasavi college, Erode** 2018 - 2021
  Bachelor of science in Electronics
  60 %
- **Sri Vasavi college, Erode** 2021- 2023
  Master of science in Applied Electronics
  75.5 %

Technical Skills

- Multimeter usage for voltage and current measurement
- Knowledge of PCB components (resistor, capacitor, diode, IC)
- Li-ion battery working principle
- Battery management system (BMS) basics
- EV architecture understanding
- Electronics testing process
- Quality inspection basics
- MS Excel for report preparation
- SOP based Testing and Documentation

Projects

- **Three phase motor coil checker**
  This project proposes a Three Phase Motor Coil Checker system that helps in detecting coil faults easily and quickly.
- **Automated Urban Drinking Water Supply Control And Theft Detection**
  This project focuses on automating the distribution of drinking water in urban areas while detecting and preventing water theft. This ensures fair water distribution, reduces wastage, prevents illegal connections, and improves overall water management efficiency in cities.

Interests

- Strong interest in EV and battery technology
- Electronics testing and validation
- Quality inspection in electronics manufacturing
- Ready to work in production and testing environment

Declaration

- I hereby declare that the above information is true to the best of my knowledge and belief.
