PROFESSIONAL SUMMARY

Entry-level Python Full Stack Developer with a B.Sc. in Computer Science and practical project experience across application development, database management, responsive web technologies, and machine learning. Built a travel booking management system with Python, Tkinter, and MySQL, and developed a CNN-based medical image classification model using TensorFlow, Keras, and OpenCV. Comfortable translating requirements into clear workflows, implementing CRUD operations, and organizing data for reliable storage and retrieval. Brings a careful, problem-solving approach and is seeking a junior Python or Django development role with opportunities to contribute and grow.

TECHNICAL SKILLS

Programming: Python, Object-Oriented Programming
Web Development: Django, HTML5, CSS3, JavaScript, responsive web development
Databases: MySQL, MongoDB, SQL, database management, CRUD operations
Machine Learning: TensorFlow, Keras, OpenCV, convolutional neural networks
Tools and Version Control: Git, GitHub, VS Code, IDLE, MySQL Workbench

PROJECTS

Travel Booking Management System | Python, Tkinter, MySQL | February 2026

Developed a Python-based system to manage travel packages, customer details, bookings, destinations, and payment information.
Translated the booking process into clear workflows for viewing available packages, creating trips, and maintaining customer information.
Implemented CRUD operations that allow users to create, review, update, and cancel booking records from the application.
Integrated MySQL to organize and retrieve booking, customer, destination, and payment information through database-backed operations.

Medical Image Classification Using CNN | TensorFlow, Keras, OpenCV | April 2025

Developed a convolutional neural network to classify medical images into predefined categories.
Prepared image data through preprocessing and augmentation before model training to support a consistent classification workflow.
Designed and trained CNN layers for automatic feature extraction, then validated the model to assess classification performance.
Used the trained model to process new medical images and predict their corresponding predefined classes.

EDUCATION

Bachelor of Science in Computer Science | 2022 - 2025

K.S. Rangasamy College of Arts and Science, Tiruchengode

CERTIFICATIONS

Master Program in Full Stack Development Using Python - Livewire | Jan 2026 - Jul 2026

INTERNSHIP EXPERIENCE

Internship in Detecting and Investigating Malware Traffic Using Wireshark - Livewire | July 2026 - Aug 2026

Internship in Python Programming and Web Development - Frenzo Academy | Jun 2024 - July 2024

CORE STRENGTHS

Problem-solving, analytical thinking, attention to detail, continuous learning, and user-focused application development

LANGUAGES

English, Tamil, Sourashtra
