EXPERIENCE

Cloud Computing Intern *Jan 2026 – Present*

Besant Technologies, Bangalore

- Learning cloud computing fundamentals and cloud service models (IaaS, PaaS, SaaS).
- Working with cloud platforms and virtual machines.
- Understanding networking concepts, IP addressing, DNS, DHCP, and firewalls.
- Learning cloud deployment models (Public, Private, Hybrid, Multi-Cloud).
- Exploring cloud services related to storage, compute, security, and monitoring.
- Gaining hands-on experience with cloud infrastructure and deployment.

EDUCATION

Bachelor of Engineering — Electronics & Communication Engineering *2022 – 2026*

AVS Engineering College

***CGPA:** 7.5 / 10*

PROJECTS

Log Analyzer Tool

Linux • Python

• Developed a Python-based log analyzer to parse and filter Linux system logs efficiently

• Automated log monitoring and error detection using shell scripting and Python regex

• Reduced manual effort in identifying system anomalies by generating structured reports from raw log files

Network Configuration Lab

CCNA • Cisco Packet Tracer

• Designed and configured enterprise network topology using Cisco Packet Tracer

• Implemented DNS, DHCP, static routing, TCP/IP addressing, and VLAN segmentation

• Troubleshot connectivity issues and validated end-to-end communication across subnets

AWS Cloud Mini Lab AWS EC2 S3 IAM VPC

• Launched EC2 instances in public and private subnets within a custom VPC

• Hosted a static website on S3 with public access policy and enabled website hosting endpoint

• Configured IAM roles, security groups, Internet Gateway, and NAT Gateway for secure access

TECHNICALSKILLS

Networking	CCNA – Routing & Switching, DNS, DHCP, TCP/IP, VLAN, Static Routing
Cloud	AWS Cloud – EC2, S3, IAM, VPC fundamentals
Operating Systems	Linux (Ubuntu/CentOS), Windows
Programming & Scripting	Python Scripting, SQL
Tools & Technologies	Shell Scripting, Log Analysis, Network Configuration

CERTIFICATIONS

- CCNA – Cisco Certified Network Associate (in progress / completed coursework)
- AWS Cloud Practitioner – Fundamentals of cloud services and infrastructure
- Linux System Administration – Command line, file management, networking

KEY STRENGTHS

- Strong understanding of OSI and TCP/IP networking models
- • Hands-on experience with Linux CLI and Python automation
- • Quick learner with ability to work on cloud and on-premise environments
- • Good analytical and problem-solving skills

LANGUAGES

- **English** (Fluent)
- **Tamil** (Native)
