Tharun S P

Full Stack Developer — CSE Final Year Graduate

tharunpalani777@gmail.com — +91-9342796964 — GitHub — LinkedIn

Objective

CSE Final Year graduate with proven expertise in Java, Data Structures & Algorithms, and Full Stack Development. Passionate about designing and implementing scalable, production-ready applications with strong focus on backend services, database optimization, and RESTful API development. Demonstrated experience collaborating across teams to deliver high-quality end-to-end solutions while maintaining code standards and resolving critical production issues.

Technical Skills

Languages: C++, Java, JavaScript, SQL, — **Frontend:** HTML, CSS, JavaScript, Basics of React
Backend: Java, Core Java — **Frameworks & APIs:** Basics of Spring Boot, REST APIs, Microservices
Databases: MySQL, Oracle SQL, NoSQL, MongoDB — **Tools & Version Control:** Git, GitHub, VS Code, IntelliJ IDEA

Experience

Java Full Stack Developer, Odugaa Tech Pvt.Ltd *June 2026 – July 2026*

- Developed robust backend services and microservices using Core Java and Spring Boot framework for highly scalable and performant applications serving thousands of concurrent users
- Designed, optimized, and normalized complex database schemas for multi-user applications ensuring data consistency, ACID compliance, and implementing efficient query optimization strategies
- Developed and deployed RESTful APIs following industry best practices and REST conventions; Integrated third-party payment gateways and external services for seamless business functionality
- Collaborated closely with frontend developers, product managers, business analysts, and QA teams to deliver comprehensive end-to-end features and maintain strict code quality standards

Projects

Placement Management System: Architected and developed comprehensive role-based access control portal managing placements, attendance tracking, and job offers processing; Engineered Excel import/export functionality with advanced data validation and error handling; Implemented offline-first progressive web application architecture using Lo-calStorage and service workers; Built secure authentication and authorization modules supporting multiple stakeholder roles (Admin, Recruiter, Student); Integrated automated email notifications and reporting dashboard

Smart Health Monitoring (SIH): Designed machine learning-based predictive system for water-borne disease forecasting utilizing Artificial Neural Networks, Random Forest, and Decision Tree algorithms; Developed real-time early-warning dashboard integrating multi-source environmental sensor data; Achieved 89% prediction accuracy through feature engineering and model optimization

Duty Allocation System: Engineered automated exam duty scheduling system with intelligent conflict resolution algorithms utilizing constraint programming reducing manual administrative effort by 80% and scheduling conflicts by 95%

Leadership & Achievements

- Tata Crucible Quiz 2025 Prelims Finalist — Competitive national-level knowledge competition demonstrating strong analytical and problem-solving abilities against top engineering colleges
- Smart India Hackathon 2025 Participant — Developed innovative solutions addressing real-world societal challenges in water resource management and healthcare sectors
- Speaker at SPRINGFEST & ABLAZE 2K25 technical conferences presenting comprehensive insights on emerging AI tools and their practical applications in modern software industry
- Mentored junior developers and conducted technical training sessions on Java Spring Boot and microservices architecture

Certifications & Programs

- Power BI Workshop — Advanced data visualization and business intelligence analysis techniques for generating actionable insights from complex datasets
- MongoDB Basics for Students — NoSQL database design, document-oriented data modeling, and scalable distributed data architecture fundamentals

Education

B.E. Computer Science and Engineering *2023 – 2027*

Government College of Engineering, Salem
