Dhanish R

Business Systems & Functional Consultant | IT Application Coordinator

Tiruchengode, India | rdhanish14@gmail.com | 8667353616 | linkedin.com/in/dhanish-r-11600a287

SUMMARY

Cross-functional business systems professional with hands-on experience spanning financial functional consulting and enterprise IT application coordination. Proven ability to translate complex business and clinical requirements into scalable ERP, reporting, and application solutions — driving measurable gains in accuracy, uptime, and data-driven decision-making across Dynamics 365, Power BI, and large stakeholder environments.

Core Competencies: Business Systems Analysis, Enterprise Applications, Requirements Gathering, Process Optimization, Cross-Functional Collaboration, Data-Driven Decision Making, Stakeholder & Vendor Management, Technical Program Coordination.

EXPERIENCE

IT Application Coordinator, KMCH – Coimbatore, India *Apr 2026 – Present*

- Own end-to-end coordination of the hospital information system (HIS) and administrative applications, supporting 500+ clinical and administrative staff as the primary IT liaison.
- Translate functional requirements from clinical and business units into precise application configurations, workflow redesigns, and system enhancements.
- Drive application uptime and reliability by managing user access provisioning, incident triage, and root-cause troubleshooting across critical hospital systems.
- Partner with software vendors and internal IT to plan, test, and deploy system upgrades and integrations with zero disruption to live operations.
- Author SOP and process documentation, lead end-user training, and strengthen governance by aligning access controls with regulatory compliance standards.

Functional Consultant, ONCHIP – Hyderabad, India *Aug 2024 – Apr 2025*

- Partnered with merchandising and operations leadership across 9+ departments to convert complex functional requirements into configured financial and reporting solutions within Dynamics 365.
- Mined large-scale financial and operational datasets to surface cost-optimization opportunities and inform strategic decision-making.
- Built automated reporting solutions that cut monthly report preparation time by 50%+ while improving accuracy and speed to insight.
- Led variance, trend, and scenario-modeling analysis to benchmark performance against budget and sharpen forecasting and inventory planning.
- Delivered executive-level dashboards and presentations that improved KPI transparency and drove data-driven strategy at the leadership level.
- Owned the monthly and quarterly close cycle end-to-end, consolidating Dynamics 365 ERP actuals and briefing senior leadership on variances and risks.

EDUCATION

Anna University, B.E. in Computer Science and Engineering *June 2020 – July 2024*

- CGPA: 8.17 | Led cross-functional student teams across leadership, volunteer, and community initiatives.
