PROFILE

Motivated Process Executive with 9 months of experience in document verification under the Jumio project. Skilled in reviewing global identity documents such as passports, driving licences, and national IDs, with strong knowledge. Holds a B.E. in Artificial Intelligence and Data Science, bringing analytical thinking, strong pattern recognition skills, and a technology-driven approach to verification processes.

PROFESSIONAL EXPERIENCE

PROCESS EXECUTIVE 04/2025 – Present | Salem

Mahendra Next Wealth IT India Pvt. Ltd

PROJECT: JUMIO

- Performed identity verification for international customers by reviewing government-issued documents such as passports, driving licences, national IDs.
- Ensured accuracy and authenticity of customer information through high-precision document validation, facial match checks.
- Analysed identity formats, security features, and document layouts to detect forged, expired, or tampered documents.
- Processed customer applications with 100% adherence to standards, and data confidentiality policies.
- Collaborated with Team leader to reduce process errors, improve verification accuracy.
- Performed MRZ (Machine Readable Zone) and HRZ (Human Readable Zone) validation to ensure document authenticity and to cross-check personal information accurately.
- Analysed multi- country identity formats, security features, holograms, fonts, watermarks, and layout structures to identify forged or invalid documents.

MS Word

PROJECTS

AI CHAT BOT 07/2024 – 08/2024

The "Al Chatbots" project aims to design and develop intelligent chatbot systems using artificial intelligence (Al) techniques. Chatbots are computer programs capable of simulating human-like conversations and have applications in customer support, information retrieval, and virtual assistance. This project leverages natural language processing (NLP) and machine learning algorithms to create chatbots that can understand user queries, provide relevant responses, and continuously improve through user interaction.
