PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate with hands-on project experience in data analysis, SQL, Excel, Power BI, and Power Query. Skilled in cleaning, transforming, and visualizing data to build dashboards and support business reporting. Comfortable working with SQL joins, aggregations, and window functions, with working knowledge of Python for basic data tasks. Seeking an entry-level Data Analyst role to apply analytical and technical skills to real business problems.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis, Business Reporting

Tools: Microsoft Excel, Power BI, Power Query

Database: SQL

Programming: Python (Basics)

Data Visualization: Power BI Dashboards, KPI Reporting

Analytics: Inventory Analysis, Supplier Performance Analysis, Supply Chain Analytics, Loan Portfolio Analysis, Credit Risk Analysis, Risk Analysis, Trend Analysis

PROJECTS

Supply Chain & Inventory Performance Analytics

Tools: SQL, Excel, Power BI, Power Query

- Analyzed inventory, supplier, purchase order, sales, delivery, and warehouse data to evaluate end-to-end supply chain performance.
- Queried data using SQL joins, aggregations, CTEs, and window functions to assess supplier performance, stock levels, and lead times.
- Cleaned and transformed multiple raw datasets using Excel and Power Query for consistent, analysis-ready data.
- Built a Power BI dashboard to monitor inventory turnover, stock-outs, supplier delivery performance, and order fulfillment rates.
- Identified slow-moving products, high-performing suppliers, and inventory risks to support purchasing and stock management decisions.

Loan Risk & Credit Portfolio Analytics

Tools: SQL, Excel, Power BI, Power Query

- Analyzed loan applications, customer profiles, income, credit history, loan amounts, and repayment status to assess portfolio health.
- Queried approval rates, default patterns, and customer risk segments using SQL across the loan dataset.
- Performed data cleaning, validation, and transformation using Excel and Power Query prior to analysis.
- Developed a Power BI dashboard tracking loan applications, approval rate, default rate, outstanding amount, and risk distribution.
- Identified high-risk customer segments and loan patterns to support data-driven credit and portfolio management decisions.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science 2023 – 2026

Periyar University

CGPA: 6.9 / 10
