DIVYESH B

divyeshb606@gmail.com | +91 9043025949 | Komarapalayam, Tamil Nadu | linkedin.com/in/divyesh-b | github.com/Divyesh2006

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science student with a strong foundation in programming, problem-solving and emerging technologies. Possess hands-on experience through academic projects and practical learning, with a strong willingness to learn and adapt to new technologies. Seeking an opportunity to apply my skills, contribute to organizational goals and grow professionally in a dynamic work environment.

EDUCATION

Bachelor of Engineering in CSE (Artificial Intelligence and Machine Learning) 2023 - 2027
Velalar College of Engineering and Technology **CGPA: 7.61/10**

TECHNICAL SKILLS

Programming Languages:	Python, Java
AI / Machine Learning:	Machine Learning Basics, NLP (Basic), Text Classification, Data Preprocessing, Model Evaluation
Web Development:	HTML, CSS
Libraries & Tools:	Pandas, Scikit-learn, Excel

PROJECTS

Voice-Controlled Robot (IoT) *Embedded C | Arduino IDE*

- Developed an Arduino-based voice-controlled robotic system using speech recognition for real-time wireless movement control and automation.
- Integrated sensor interfacing, motor driver modules and embedded programming to execute voice commands with accurate directional navigation.
- Implemented an efficient hardware-software architecture enabling reliable obstacle-aware movement and hands-free robotic control.

Digital Blood Donation Management System *Node.js | MongoDB | HTML | CSS | JavaScript*

- Developed a full-stack blood donation management system to streamline donor registration, blood availability tracking, and emergency request management.
- Implemented secure CRUD operations with MongoDB and Node.js, enabling efficient storage, retrieval and management of donor and recipient records.
- Built a responsive web interface with role-based functionalities to improve accessibility, data management and overall user experience.

QDine - Smart Restaurant Queue Management System *Core Java | Spring Boot*

- Developed a full-stack smart restaurant management system to optimize queue handling and operations.
- Integrated AI-driven wait time predictions, virtual queues and a live table map visualization to enhance the customer dining experience.
- Built an analytics dashboard for restaurant managers and implemented secure RESTful APIs with Express and JWT authentication.

CERTIFICATIONS

Data Structure and Algorithm (Java) – Finest Coder – *April 2026*
Microsoft Power BI (Value Added Course) - *April 2025*
Intro to Deep Learning - Kaggle - *July 2025*
Pandas - Kaggle - *July 2025*

ACHIEVEMENTS & AWARDS

- Secured 1st Place – College Project Expo (2024 & 2025) for consecutive years for innovative project design and implementation.
- Secured 3rd Place – Paper Presentation, Nandha Engineering College (Feb 28, 2025) for technical research presentation.
- TCS ION National Qualifier Test (NQT) – 2026: Secured 65.76%.
