PROFESSIONAL SUMMARY

Computer Science graduate with foundational knowledge of **Python**, SQL, OOP, DSA, and **software development**. Built **AI**-powered applications using **LLMs**, **Claude**, Gemini, and Ollama, with project experience in REST APIs, API integration, and workflow automation. Strong interest in **problem-solving**, debugging, and developing reliable, scalable software solutions.

EDUCATION

B.E. in Computer Science and Engineering, *Jayalakshmi Institute of Technology* 2022 – 2026
CGPA: 7.0 / 10

TECHNICAL SKILLS

Programming
Python, SQL, JavaScript

Automation & Workflow
n8n, Webhooks, API Integration

Tools
Claude, VSCode, Git, GitHub,Loveable

AI & LLM Integration
ChatGPT, Claude API, Gemini API, Ollama, Prompt Engineering

Core Concepts
Data Structures & Algorithms, OOP, SDLC

PROJECTS

Personal Al Agent, *Python | Multi-LLM | Voice Al*
- Engineered CLI-based Al assistant integrating Claude, Gemini APIs, and local models via Ollama
- Designed dynamic model-routing logic for multi-provider Al orchestration
- Integrated ElevenLabs API for real-time text-to-speech functionality
- Implemented modular architecture enabling scalability and future feature expansion

AI Intelligence Career Guidance Web Application
- Developed an AI-based career guidance web application using **VADER** and **SBERT**.
- Analyzed user academic details, skills, and resume data to provide **personalized career recommendations**.
- Used **SBERT** for **semantic similarit**y and **VADER** for **sentiment analysis** of user inputs.
- Designed the application to help users **identify suitable career paths** and opportunities based on their profiles

Tech Stack: Python, Flask, NLP, VADER, SBERT, HTML, CSS, JavaScript, SQLite.

Secure Dynamic ZIP Code Pricing Shopify App
- Developed a secure Shopify embedded application to deliver dynamic product pricing based on customer ZIP codes.
- Implemented a backend REST API and integrated it with a React-based frontend for real-time price retrieval.
- Improved application security by moving pricing logic from the frontend to the backend using a scalable full-stack architecture.

Skills: React, JavaScript, Shopify CLI, Shopify App Development, React Router v7, REST API, Fetch API, JSON, Git, GitHub

School Reunion Website, *Python | SQL | Full Stack*
- Developed CRUD-based full-stack web application for alumni data management
- Designed structured SQL database schema
- Implemented modular backend logic with validation and error handling

Al Automation Workflow, *n8n | API Integration*
- Designed webhook-triggered automation pipelines
- Integrated AI APIs for intelligent task execution
- Implemented conditional routing for structured workflow processing

CERTIFICATIONS

- Cloud Engineering | Google
- Google Cloud Data Analytics
- Mobile App Development Using Flutter
